Rychnovsky Lawn, Inc. is implementing an exciting product to our **Green and Clean 5 Step Program**! Please take a few moments to learn how DurationCR fertilizer will improve your lawn.

If you currently receive all 5 steps in our **Green and Clean Application Program**, you will now receive a **180 day time release fertilizer** in Step 1. DurationCR enhanced efficiency fertilizer utilizes break-through technology with the capability of feeding your lawn through early fall! Your lawn will perform at its highest potential throughout the growing season because of consistent, controlled nutrient release. This "**golf course grade**" product will eliminate the need for fertilizer to be reapplied in steps 2, 3, and 4 due to the **180 day time release** of nutrient. Step 5 will remain your final fertilization of the season.

If you are not currently receiving all 5 steps in our **Green and Clean 5 Step Application Program**, but would like to benefit from DurationCR fertilizer, please make a note on our enclosure and return. We will contact you with pricing options to create a stronger, healthier lawn. Customers not participating in all 5 steps will find their applications in the Green and Clean "A LA CARTE" Program.

GREEN & CLEAN 5 STEP PROGRAM:

***STEP 1 Early Spring = DurationCR Enhanced Efficiency 180 day controlled release fertilizer with grassy-type weed preventer**

-Customers who have opted for grub control will also receive an insecticide for grub prevention

***STEP 2 Late spring = Broadleaf weed control**

-This application eliminates a wide range of broadleaf weeds in your lawn

***STEP 3 Mid-Season = Grassy weed and broadleaf weed control**

-This application eliminates grassy weeds and broadleaf weeds that may have emerged mid-season

***STEP 4 Early Fall = Broadleaf weed control**

-This application eliminates a wide range of broadleaf weeds in your lawn

***STEP 5 Late Fall = Winterization fertilizer**

-This is our final application of the season which will ensure the plant has plenty of stored nutrients to recover from dormancy in the spring.

GREEN & CLEAN A LA CARTE PROGRAM:

***STEP 1 Early Spring = 30 day slow release fertilizer with crab-grass preventer**

-This application provides time released nutrients to your lawn as it emerges from dormancy and prevents germination of grassy-type weeds

***STEP 2 Late spring = Broadleaf weed control**

-This application eliminates a wide range of broadleaf weeds in your lawn
-Customers have option to add 30 day slow release fertilizer to this step at an additional charge

***STEP 3 Mid-Season = Application of 30 day slow release fertilizer with grub control**

-This product is specifically formulated to help alleviate stress of summer and prevent grub damage

***STEP 4 Early Fall = Broadleaf weed control**

-This application eliminates a wide range of broadleaf weeds in your lawn
-Customers have option to add 30 day slow release fertilizer to this step at an additional charge

***STEP 5 Late Fall = Winterization fertilizer**

-This is our final application of the season which will ensure the plant has plenty of stored nutrients to recover from dormancy in the spring

*DurationCR is **NOT** available in "A LA CARTE"
