Re: Cornell University
WCRI Phase 4

Dear Kris:

I wanted to take the time and thank you for the excellent job managing the coordination drawing process for Cornell WCRI Phase 4. Once again you have impressed my team and also the representatives from Cornell University. You always met your deadlines, you acted in a very professional manor and there was not one thing you did that did not have the proper documentation. You are one of the major reasons the project is where it is now. You set us up to succeed, and we all appreciate this.

Please forward this to any potential customers, and let this letter be a testament to the outstanding job they will get if they hire you!

From the entire WCRI Team, Thank you!

Thank you,

Respectfully,

A handwritten signature in black ink, appearing to read 'Norm Aidun', written in a cursive style.
