

● GlassWall™

Movable Partitions

The right choice has never been **more clear.**

Combining the drama and beauty of glass with the functionality of operable partitions, Hufcor's GlassWall™ movable partitions allow natural light to flood the interior space while providing space flexibility. Found in buildings across markets around the world, our range of movable GlassWall™ solutions can be engineered and designed to fulfill the specifications and requirements of any interior space.

"I have had the pleasure of working with the Hufcor team for the past 8 years; they are the only team I will use for my movable glass walls and room dividers! They are always available and ready to solve unique design problems. Having them in my backyard is a definite plus; their service team is awesome, very prompt if an issue happens to arise. Keep up the good work!"

Frameless GlassWall™ provides added beauty and security to retail storefronts.

Frameless GlassWall™

Divide your space seamlessly with Hufcor's Frameless GlassWall™. Ideal for spaces where a physical but not a visual barrier is needed, our Frameless GlassWall™ allows natural light to penetrate a space and deliver maximum space flexibility. Frameless GlassWall™ incorporates glass mounted on slimline top and bottom horizontal rails, eliminating the need for vertical frame members which block sight-lines and obstruct views.

FEATURES

- » For openings up to 10'5" (3.2m) high and unlimited width
- » No vertical frame members provide continuous sight-lines, unobstructed views and maximum use of available light
- » Mechanically-fastened top & bottom rails for durable, trouble-free operation
- » Can be installed in either new or existing construction
- » Ability to create curved walls opens up a new range of design possibilities
- » No floor tracks means no debris accumulation, tripping hazards or usable space interference
- » Polished glass edges for clean finished look

OPTIONS

- » Single panels
- » Paired panels
- » Custom rail cladding
- » In-line pass doors
- » Unispan® support system
- » Top & bottom sweeps
- » Vertical trim

FRAME FINISHES

- » Anodized full range
- » Custom colors
- » Vinyl wraps

GLASS OPTIONS

- » Translucent & Etched
- » Factory-applied custom graphics and decals
- » Field-applied custom graphics such as painted, murals, decals, glass treatments

Art glass, artistic sheets, etchings, decals and a variety of laminations offer designers a full palette of glass options and treatments from which to choose.

Acoustic GlassWall™ provides flexible space division where both visibility and sound control is desired.

Acoustic GlassWall™

Meet the GlassWall™ with superior sound-stopping performance. Hufcor's GlassWall™ Ultra is the next generation of movable glass wall systems offering unparalleled sound control with sound ratings up to 46 STC. This system combines the welded steel frame design of Hufcor's world class 600 Series™ operable wall partitions with a two inch insulated glass unit to achieve optimal acoustic performance while allowing natural light to enter the interior spaces. Ideal for convention centers, offices and educational facilities. Our GlassWall™ Ultra brings transparency and quietness into a space to ensure a pleasant, light-infused experience.

FEATURES

- » For openings up to 12'2" (3.7m) high and unlimited width
- » Lab-proven and industry-leading 46 STC sound control (45 STC and 35 STC versions also available)
- » Welded steel and aluminum construction with dual laminated tempered glass for excellent durability and rigidity
- » Quick-Set™ seals—fast and easy waist-high operation
- » Can be installed in either new or existing construction
- » Ability to create curved walls open up a new range of design possibilities
- » No floor tracks means no debris accumulation, tripping hazards or usable space interference
- » Can be combined with 600 Series™ panels

OPTIONS

- » Both single and paired panels
- » Hinged closure panels
- » Taller height options
- » Sound absorption insets
- » Partial height insets
- » Work surface insets
- » ADA pass door with optional panic door pushbar
- » Custom colors
- » Unispan® support system

FRAME OPTIONS

- » Custom colors
- » Vinyl wraps

GLASS OPTIONS

- » Translucent & Etched
- » Factory-applied custom graphics and decals
- » Field-applied custom graphics such as painted, murals, decals, glass treatments

Hufcor's acoustic GlassWall™ lead the industry with a sound-stopping 46 STC rating.

Custom finish options such as full or partial height dry erase marker board are available.

Timberframe™ GlassWall™

Available in a wide variety of wood, hardware and glass options, Hufcor's Timberframe™ GlassWall™ glass panels combine the openness and light transmission of glass with the warmth and beauty of Oak, Maple, Cherry or Douglas Fir. Timberframe™ GlassWall™ consists of glass surrounded by wood frames composed of triple-laminated solid wood top rails, bottom rails and stiles that are constructed from custom made veneers, solid wood edges and an engineered wood core to ensure dimensional stability and trouble-free performance for a wide variety of applications. The glass panels are suspended overhead—no floor tracks or guides collecting dirt or interfering with your space.

FEATURES

- » For openings up to 11' 8¾" (3.57m) high and unlimited width
- » Can be installed in either new or existing construction
- » Curved walls open up a range of design possibilities
- » No floor tracks means no debris accumulation, tripping hazards or usable space interference
- » Designing glass panels into your facility allows natural sunlight into your space, which could qualify for LEED points for Indoor Environmental Quality (IEQ) Credit 8.2: Daylight and Views

OPTIONS

- » Single panels
- » Paired panels
- » Pivot panels
- » Custom frames & veneers
- » Custom design features
- » Custom raised panels
- » Custom inserts
- » In-line pass doors
- » Unfinished or stained & sealed
- » Unispan® support system
