<p>Talking with your Kids about Alcohol and Drugs – This program utilizes the PRIME For Life® curriculum and is an evidence-based motivational prevention program. The program starts with building principles about other lifestyle related health problems to build a bridge to talk about Alcohol and Drugs – how they develop and can be prevented. This program prepares parents for a larger conversation about AOD with more than the slogan of “Just Say No.” It helps parents understand how to encourage low risk choices (abstinence or harm reduction). The course includes how to create your own list of talking points, family expectations and boundaries. 6-hour course - This course will include the PFL workbook. We recommend parents take the course before their teens to coordinate talking points. The cost is \$95.00. <p>Teens Navigate Alcohol and Drug Choices – (Ages 14-18): This program utilizes the PRIME For Life® curriculum and is facilitated in a small group setting. It helps students feel engaged and comfortable sharing their thoughts, feelings, and doing some self-reflections. An understanding of the potential risks associated with high-risk alcohol and drug choices is an important tool for protecting what we value. When presented in a non-judgmental way, carefully selected information can provoke new thinking and provide individuals with a solid basis for making decisions about their own drinking and drug use. They learn how to make low-risk choices by using a simple tool and how the combination of influences and personal choices determine outcomes. Students identify things they value in their lives and make their own decisions about when and how to protect them. – 6-hour course - This course will include the PFL workbook. The cost is \$95.00.
