

SABBATICAL CYCLE COUNTDOWN

The purpose of this illustration is to speculate on an approximation of the timeline that suggests when the 70th Week of Years is to possibly commence. This timeline is an approximation based on the Jubilee Cycle pattern of Sabbatical Cycles. The primary thesis of when the 70th Week of Years is to start is predicated on the notion that if and when the 7-year Tribulation is to start, it would have to start at the beginning of a 7-year Sabbatical Cycle pattern. The timeline will show the years from 2001 to have a running countdown of the Sabbatical Years for perspective. This assertion is based on this pattern, the next Sabbatical Cycle that seems to 'fit' the pattern would be in 2022 or in the Jewish year of 5783. What is rather interesting is that based on this pattern and year, there are 3 Feasts of YHVH that appear to 'fit' the exact timeline of 2 equal day-counts of 1260 days. The suggested Feast day would be on Shemini Atzerets in October shortly after the commencement of the Sabbatical Cycle in late 2022. This would then put the exact midpoint of the Tribulation on April 1, 2016, being Passover. Then 1260 days later, the concluding Feast would be September 11, 2029 or 5790. This has been shown in prior studies that it could parallel the 1st and 2nd appearances of Jesus to Earth. The timeline also would presuppose the Rapture to be prior to this suggested timeline and the beginning of the 70th Week of Year Sabbatical Cycle.

THE 70TH WEEK OF YEARS TRIBULATION PERIOD TIMELINE

1. Currently within **70th** Jubilee since Israel entered Promised Land.
2. The **70th** Week of Years would correspond to the 5th Sabbatical Cycle of 7 in a Jubilee.
3. And just as book of Enoch foretold Messiah would come on **70th** Generation and did
4. Jesus will also be returning within **70th** Jubilee Count.

5. In 2018, Israel reached **70th** year since Nation born in 1948.
6. Had been 1,948 years since Temple destroyed in **70 AD**.
7. In 2018, the Altar of Sacrifice was re-dedicated, as Ezra **70** years after coming from Babylon.

The Jubilee Sabbatical Cycle Pattern is derived from the works of Floyd Nolen Jones, Bishop Lloyd, Monsignor Toinard, William Whiston, Josephus and Ussher. The calculation is based on the date of Israel crossing the Jordan River into the Promised Land with Joshua leading. The year is suggested to be have been -1451 BC. This was the year Moses died at the age of 120 years. Thus, the 'Jubilee Clock' started then on **Nissan 1, -1443 BC**. This would start the count of the first 49 years or the 1st Jubilee at: **-1437/-1436 = Sab # 1**. It is then from this countdown that the subsequent Sabbatical Cycles of 7 years are derived from. And then they can be then calculated down to the Last Generation and the end of the Church Age to conclude with the Resurrection-Rapture event.

This Jubilee Pattern of Sabbatical Cycles does appear to thus also synchronize with the public reading of Isaiah's Jubilee portion of Scripture that Jesus read in the Synagogue of Nazareth that would correspond to **28 AD**. This would then be in sync with the 70th Jubilee Cycle that would be and is then the Last Generation. And perhaps how the 70th Week of Years per Daniel would constitute the 5th of the 7 Sabbatical Cycles within that 70th Jubilee Cycle.
