

About the Virtual Basic EMDR Training

The Virtual Basic EMDR Training is Approved by the EMDR International Association (www.emdria.org) and represents a departure from the traditional two-weekend training models with an innovative format.

- ☑ It is designed to lead the participants in a sequential and orderly learning experience emphasizing conceptual clarity, procedural details, and skill development through a combination of lectures, discussions, and video vignettes drawn from actual EMDR therapy sessions culminating in supervised practice.
- ☑ Effective learning is facilitated by pacing the training across 10 days on six weekends, spanning 12 weeks to avoid information overload (Total of 90 hours)
- ☑ Mandated Ten hours of Consultation is built into the Training
- ☑ Small group format limited to TEN participants provides for intensive discussions and didactic interactions with the instructor
- ☑ Participants will meet with each other in DYADS for four hours a week, during the 10 weeks of training implementing EMDR Therapy protocols & procedures with ongoing support
- ☑ Implementing EMDR Therapy in DYADS in concurrent practice during the course of training further consolidates skills & competencies

Faculty

Dr. Chandra Nagireddy has a Ph.D. in Marriage & Family Therapy from The University of Georgia. Since 2005, Dr. Chandra served as a Facilitator with EMDR Institute and EMDR-HAP until 2014. His passion has been exploring the enormous healing potential inherent in EMDR and teasing out the nuances in its practice as articulated by Dr. Francine Shapiro.

Training Highlights

Conceptual Clarity through

- ☑ An in-depth understanding of the theory underlying the practice of EMDR- Adaptive Information Processing (AIP)
- ☑ An in-depth understanding of protocols and procedures
- ☑ A sound analytical framework arrived through explicitly linking AIP theory to EMDR protocols and procedures to guide treatment decisions

Skill Development is Facilitated by

- ☑ Walking the participants through every step of EMDR therapy in an orderly and sequential manner mirroring the therapy process in actual practice
- ☑ Demonstrating all the eight phases of the EMDR protocol and procedures through video vignettes drawn from actual therapy sessions
- ☑ Followed by supervised practice in Dyads

Translating Training into Clinical Practice is Accomplished by

- ☑ Requiring participants to implement EMDR with their "client" partners in their Dyad starting the second weekend with ongoing support through the next ten weeks (40 hours)
- ☑ Providing templates of all the protocols, procedures and guidelines in digital format for immediate use in clinical practice
- ☑ An ongoing Discussion Board to support and encourage integration of EMDR into clinical practice

Training Orientation

- ☑ Emphasis on client safety & stabilization before change
- ☑ Client Centered and Phenomenologically Grounded
- ☑ Relational context as critical for healing
- ☑ Client's "Trust" is earned through demonstrated competency
- ☑ An Integrative & Comprehensive Psychotherapy Approach

Application of EMDR

- ☑ Complex PTSD/Victims of Sexual Abuse/War & Combat Trauma/Trauma & Dissociation/Addictions/Phobias & Current Anxiety/Illness & Somatic Disorders/Grief & Mourning/Recent Trauma/Children & Couples
