

5-31-2018

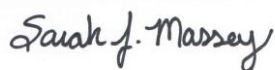

Dear Roughrider Health Promotion Participants,

As school team participants of this year's Roughrider Health Promotion Conference, we are happy to provide you with a Sun Safety sampler backpack to use in your school to support student education. Sun safety for students, is an important component of health promotion within schools.

The slides from the presentation today have many resource links that will also be very beneficial for your planning of either this year's annual school wellness activities or in future years.

If you are interested in technical support to implement sun safety activities or sun safe practices, please reach out to Sarah Massey, School Health Specialist or Jesse Tran, Program Director for the Comprehensive Cancer Control Program.

Regards,

Sarah J. Massey  
School Health Specialist  
Division of Family Health & Nutrition  
Infant and Child Death Program Director  
Division of Injury & Violence Prevention
