to me

I just wanted to send a note regarding the work that was done at our residence during the month of June. The project was handled by Dave Gilbert and wanted to give a huge "shout out" for the suburb job that was done!

Beginning of June, 3 gentlemen knocked on our door with information regarding roof repairs due to recent hail storms. The second one was Dave and he was the one that impressed me the most with his knowledge and the way he presented himself regarding what Advanced Construction could do for us.

Dave was present at our house when the insurance adjuster came and answered any and all questions that were asked. When the crews showed up to do the work, Dave was there to oversee and to keep me informed of what was going to happen next etc. When the crew was done, there were a few things that we felt needed to be redone and Dave listened and acted and work has now been done to our 100% perfection. Also want to add that the crews were very professional as well. When they would leave at the end of each day, there was no indication that they had been there as they cleaned up really well.

All in all, our experience with Advanced Construction deserved to be mentioned. Many people only write when they have complaints, I write as i am very pleased. If i ever hear of anyone who needs or wants work done for roofs and gutters, i will recommend Dave and Advanced Construction.

Best Regards

To whom it may concern:

RE: ADVANCED CONSTRUCTION

My wife and I are pleased to provide this reference letter for Advanced Construction Co.

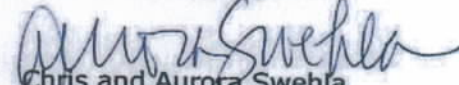

Over the last month, Advanced Construction, has worked with us replacing our roof, gutters and garage door wrap. In addition, Dave Gilbert, was particularly helpful in guiding us through process of working with our insurance provider to get all the incidentals identified and recognized in the estimate.

We found Advanced Construction to be very knowledgeable, professional and responsive throughout the course of the project. We had a lot of questions since we haven't been through this process before. Since they have completed the work they have been very responsive and thorough in addressing our questions. Albeit, most of the questions were about future work we are contemplating having done that was not in this project.

We look forward to working with them again in the future.

We would recommend Advanced Construction to you without hesitation.

Sincerely,

Chris and Aurora Swehla

RE: Advanced Construction and Improvement

I met Dave Gilbert from Advanced Construction when he was inspecting my neighbor's roof. He had finished there and approached me regarding doing an inspection of my roof. He went onto the roof and took some pictures and showed me that I had significant hail damage. Advanced Construction was willing to replace my roof for whatever my insurance would cover plus my deductible.

I contacted my insurance company to see about filing a claim for the damage.

The insurance company sent out an adjustor to inspect the roof. Yes, significant hail damage and, Yes, they would be writing a check to help fix my roof.

I, again, met with Dave Gilbert, we worked out the details (my home and two out buildings) and a date for the installation. A couple weeks later, a truck from ABC Building Supply showed up and unloaded all the supplies for the job (including hoisting the shingles onto the roof with a crane). The installation crew worked diligently for two days (and believe me I watch like a hawk when work is being done at my home) to complete the entire job. They did a lot of tarp work to protect my property and landscaping from damage when tearing off the roof and did a good job of cleaning up after the work was finished.

If you are looking for a roof replacement, I would recommend contacting Dave Gilbert from Advanced Construction and see what they can do for you!!!!
