

ReVivo Medical

Press Release

ReVivo Medical Receives First Patent

September 20, 2016. ReVivo Medical, LLC announced today that it has been granted its first patent relating to the methods of use of implantable orthopedic devices. “Our business is about inventing and bringing devices to market that improve patient outcomes and reduce costs.” says Gary Mittleman, president and CEO “Our patent policy is an important means of protecting the value of our ideas for our investors.”

“Traditional clinical procedures often obscure the surgeon’s anatomical landmarks when orienting the cervical plate into its optimal position.” explains Eric Ledet, PhD. one of the two co-inventors along with Glenn Sanders, PhD. “Our patented method will eliminate this potential issue and is expected to improve surgical outcomes and reduce operating room time.” The Company currently has additional patent applications under review.

About ReVivo Medical, LLC., headquartered in Albany, New York, is developing elastic micro-motion implantable medical products for use by surgeons on patients with spinal pathology. Spinal surgeries often use plates (akin to splints) to hold the vertebrae in place during the healing process. The founders, Darryl DiRisio, MD. a spinal surgeon at Albany Medical Center and two biomedical engineers: Eric Ledet, PhD. and Glenn Sanders, PhD. teamed up in 2011 with the aim of developing products that improve patient health, facilitate an easier surgery process and reduce costs in this ever competitive healthcare arena. The Company expects its first commercial sales in 2017.

Cautionary Statement Regarding Forward Looking Statements

This press release contains forward-looking statements that are not purely historical regarding ReVivo Medical's or its management's intentions, beliefs, expectations and strategies for the future, including those relating to the development, cost, size, intended use and technical specifications of the medical products, the potential impact on outcomes and costs associated with spinal surgeries, and the potential profits to be made by ReVivo Medical pursuant to the successful commercialization of their product(s) and the size of market and market share of products. Because such statements deal with future events, they are subject to various risks and uncertainties, and actual results could differ materially from ReVivo Medical's current expectations.

ReVivo Medical

Factors that could cause actual results to differ materially include risks and uncertainties such as those relating to: the inability to successfully develop new products and obtain regulatory approval; a lack of acceptance in the marketplace by physicians and patients; the inability to manufacture products in commercial quantities at an acceptable cost; possible delays in the company's development programs; the inability of patients or hospitals to receive reimbursement from third-party payors; and inadequate financial and other resources.

All forward-looking statements and reasons why results might differ included in this release are made as of the date of this press release, based on information currently available to ReVivo Medical, and ReVivo Medical assumes no obligation to update any such forward-looking statement or reasons why results might differ.
