## Lesson 13:

Subtract mixed numbers from mixed numbers with related units.

CCSS Standard – 5.NF.A.1 / 5.NF.A.2

**FLUENCY** (10-min)

**Whiteboard Exchange: Interpret Division as a Fraction**

Write the quotient as a fraction. Then express the quotient as a whole number if possible.

$$1 \div 4 = \boxed{\phantom{00}}$$

$$3 \div 4 = \boxed{\phantom{00}}$$

$$8 \div 4 = \boxed{\phantom{00}} = \boxed{\phantom{00}}$$

$$16 \div 4 = \boxed{\phantom{00}} = \boxed{\phantom{00}}$$

$$2 \div 5 = \boxed{\phantom{00}}$$

$$3 \div 5 = \boxed{\phantom{00}}$$

$$5 \div 5 = \boxed{\phantom{00}} = \boxed{\phantom{00}}$$

$$20 \div 5 = \boxed{\phantom{00}} = \boxed{\phantom{00}}$$

**FLUENCY** (15-min)

**Choral Response: Decompose Whole Numbers**

What is the unknown part? Raise your hand when you know.

When I give the signal, say the completed equation. Ready?

$$2\frac{1}{3} = 1 + \underline{\quad}$$

**FLUENCY** (15-min)

**Choral Response: Decompose Whole Numbers**

What is the unknown part? Raise your hand when you know.

When I give the signal, say the completed equation. Ready?

$$2\frac{2}{4} = \underline{\hspace{2cm}} + 1\frac{2}{4}$$

**FLUENCY** (15-min)

**Choral Response: Decompose Whole Numbers**

What is the unknown part? Raise your hand when you know.

When I give the signal, say the completed equation. Ready?

$$3\frac{4}{5} = 1 + \underline{\hspace{2cm}}$$

**FLUENCY** (15-min)

**Choral Response: Decompose Whole Numbers**

What is the unknown part? Raise your hand when you know.

When I give the signal, say the completed equation. Ready?

$$3\frac{5}{7} = \underline{\quad} + 2\frac{5}{7}$$

**FLUENCY** (15-min)

**Choral Response: Decompose Whole Numbers**

What is the unknown part? Raise your hand when you know.

When I give the signal, say the completed equation. Ready?

$$5\frac{7}{9} = 1 + \underline{\hspace{2cm}}$$

**FLUENCY** (15-min)

**Choral Response: Decompose Whole Numbers**

What is the unknown part? Raise your hand when you know.

When I give the signal, say the completed equation. Ready?

$$8\frac{9}{10} = \underline{\quad} + 7\frac{9}{10}$$

**FLUENCY** (10-min)

**Whiteboard Exchange: Make the Next Whole Number**

**Write and complete the equation.**

$$\frac{3}{4} + \underline{\quad} = 1$$

A large, empty rectangular box with a thin black border, intended for the student to write their answer to the equation.

**FLUENCY** (10-min)

**Whiteboard Exchange: Make the Next Whole Number**

**Write and complete the equation.**

$$\underline{\quad} + \frac{5}{7} = 1$$

**FLUENCY** (10-min)

**Whiteboard Exchange: Make the Next Whole Number**

Write and complete the equation.

$$\frac{2}{9} + \underline{\quad} = 1$$

**FLUENCY** (10-min)

**Whiteboard Exchange: Make the Next Whole Number**

**Write and complete the equation.**

$$\underline{\quad} + \frac{4}{12} = 1$$

**LAUNCH** (5-min)

Analyze expressions to make connections between subtraction of whole numbers and subtraction of mixed numbers.

Can you subtract this using **MENTAL MATH**?

$$86 - 34$$

Yes, since there is no REGROUPING needed, we just have to subtract the ones from the ones and the tens from the tens.

$$8\frac{6}{10} - 3\frac{4}{10}$$

What is the same and what is different compared to the previous expression?

**SAME:**

- Both show subtraction.
- I can subtract the whole numbers mentally.
- I can subtract the fractions mentally.
- There is NO RENAMING NEEDED.

**DIFFERENT:**

- The units are different.
- One is whole numbers the other mixed numbers.

**LAUNCH** (5-min)

Analyze expressions to make connections between subtraction of whole numbers and subtraction of mixed numbers.

Can you subtract this using **MENTAL MATH**?

$$82 - 47$$

Maybe, there are not enough ones to subtract so REGROUPING IS NEEDED.

What might you plan to do to subtract 47 from 82?

- **Decompose** the 47 into parts then subtract the parts from 82.  $(82 - 42 = 40 - 5 = 35)$
- **Rename** 82 as 7 tens and 12 ones.  $(70 + 12 - 40 - 7 = 35)$
- **Add-on** beginning with 47.  $(47 + 3 = 50 + 30 = 80 + 2 = 82)$

$$8\frac{2}{10} - 4\frac{7}{10}$$

What might you do to subtract this expression?

- **Decompose**  $4\frac{7}{10}$  into parts and then subtract the parts from  $8\frac{2}{10}$ .
- **Add-on** beginning with  $4\frac{7}{10}$ .

**LAUNCH** (5-min)

Analyze expressions to make connections between subtraction of whole numbers and subtraction of mixed numbers.

- **Decompose**  $4 \frac{7}{10}$  into parts and then subtract the parts from  $8 \frac{2}{10}$ .

$$8 \frac{2}{10} - 4 \frac{7}{10}$$

$$8 \frac{2}{10} - 4 \frac{2}{10} =$$

$$4 - \frac{5}{10} =$$

$$3 \frac{5}{10}$$

- **Add-on** beginning with  $4 \frac{7}{10}$ .

$$8 \frac{2}{10} - 4 \frac{7}{10}$$

$$4 \frac{7}{10} + \frac{3}{10} = 5$$

$$5 + 3 \frac{2}{10} = 8 \frac{2}{10}$$

$$\frac{3}{10} + 3 \frac{2}{10} = 3 \frac{5}{10}$$

## Subtract Like Units

LEARN BOOK – PAGE 113

$$4\frac{5}{8} - 2\frac{3}{16} = \underline{2\frac{7}{16}}$$

$$4\frac{10}{16}$$

*Are the fractional units related or unrelated? How do you know?*

*Related. 8 is a factor of 16 and 16 is a multiple of 8.*

*Before we solve this expression, let's estimate the difference.*

*About  $4\frac{1}{2}$  minus 2, so the answer is between 2 and 3.*

*Are we ready to subtract the units as they are right now?*

*No, because the fractional parts do not have LIKE units.*

*Are we ready to subtract the units as they are right now?*

*YES!,  $4 - 2 = 2$  and  $10/16 - 3/16 = 7/16$*

**LEARN** (35-min)**Subtract Like Units**

LEARN BOOK – PAGE 113

$$9\frac{1}{6} - 4\frac{10}{12} = \underline{4\frac{2}{6}}$$

$$9\frac{1}{6} - 4\frac{5}{6}$$

$\downarrow$        $\swarrow$        $\searrow$   
 $4$        $\frac{1}{6}$        $\frac{4}{6}$

$$9\frac{1}{6} - \frac{1}{6} = 9$$

$$9 - 4 = 5$$

$$5 - \frac{4}{6} = 4\frac{2}{6}$$

*Are the fractional units related or unrelated? How do you know?*

*Related. 6 is a factor of 12 and 12 is a multiple of 6.*

*Before we solve this expression, let's estimate the difference.*

*About 9 minus 5, so the answer is between 4 and 5.*

*Are we ready to subtract the units as they are right now?*

*No, because the fractional parts do not have LIKE units.*

*The fractional units are LIKE units, but are we ready to subtract?*

*No, we are going to have to decompose to help us subtract.*

**LEARN** (35-min)

**Subtract Like Units**

LEARN BOOK – PAGE 113

$$18\frac{5}{16} - 7\frac{3}{4}$$

$$7\frac{12}{16}$$

↓      ↓      ↓

$$7 \quad \frac{5}{16} \quad \frac{7}{16}$$

$$18\frac{5}{16} - \frac{5}{16} = 18$$

$$18 - 7 = 11$$

$$11 - \frac{7}{16} = 10\frac{9}{16}$$

*Are the fractional units related or unrelated? How do you know?*

***Related.** 16 is a factor of 4 and 16 is a multiple of 4.*

*Before we solve this expression, let's estimate the difference.*

*About 18 minus 8, so the answer is between 10 and 11.*

*Are we ready to subtract the units as they are right now?*

*No, because the fractional parts do not have LIKE units.*

*The fractional units are LIKE units, but are we ready to subtract?*

*No, we are going to have to decompose to help us subtract.*
