The SAFE Business Framework

THINK SAFETY FIRST

01 Queue Management

1. At main entrances People Counting cameras check the numbers coming in and out
2. Digital signage shows allowed capacity, and the no of people inside
3. Options for targeted messaging and signage

Realtime temperature checks: < .05 secs

03 Sanitization

1. Person is prompted to sanitize their hands
2. The HandyPOS displays health awareness messaging and guidelines
3. Optional integration to Business Loyalty Programs

Maintain "Safe Distancing"

05 Analytics

1. Realtime dashboards showing customer flows and trend patterns
2. Analytics tailored to provide you with focused information and insights to keep your business safe and profitable

02 Access Management

1. CheckPoint reads and displays temperature as person approaches, while also providing voiceover,
2. If temperature is OK then displays messaging to sanitize hands and if required can also trigger door/gate opening
3. If temperature is not OK then exception process is engaged

Managing the numbers allowed into premises

Sanitization & Health Promotion

04 Space Management

1. Thermal Imaging cameras track the people as they move through the premises
2. Any threshold/spacing breaches are alerted to staff leaders
3. Digital signage reminds customers of spacing requirements and local guidelines

Data and intelligence to keep you in control
