

Get the Speed You Pay for and Need

You're paying your ISP a pretty penny every month for fast Internet speeds. Your router determines whether or not you get your money's worth.

The team that created Island are pioneers in networking and the products they have created over the past four decades have been in the world's largest companies. Now all that expertise is available in Island.

With its premium, enterprise-grade hardware and high-speed packet engine, Island delivers the same performance as routers in today's large businesses.

- 3.7 Gbps max throughput lets you use the entire Internet connection from your ISP
- 2,000,000 packets per second gives you blazing-fast speeds, even when all users are on and active
- 165,000 connections per second for faster webpage loads
- 5,000-device capacity means Island can handle any load you put on it

Island Router: Internet Protection for What Matters Most

Finally a router that provides the speed you need for your busy household, but also the control and protection you need for your family.

That's Island peace of mind.

Parental Controls Easy. Flexible.

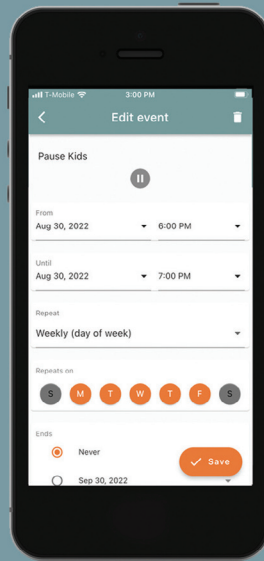

Our one-tap, preconfigured umbrella filters let you schedule Internet access by time of day and day of week on a device, user, or group basis.

Get the kids downstairs for dinner on time
Pause all kids' devices between 6-7 pm.

Hand your toddler an iPad and never worry they'll get to an inappropriate site
Click two umbrellas and block the bad stuff or create a custom filter that allows access to only their favorite game.

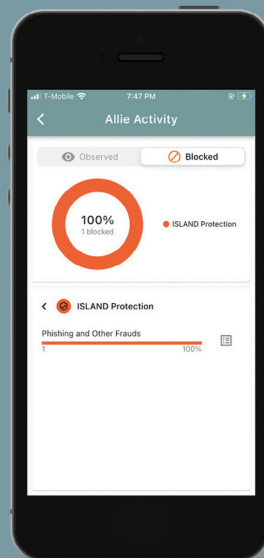

Make sure your teen doesn't game or stay on social media all night
Create a schedule that blocks all access between 10:30 pm-8:00 am.

Island keeps you in control.

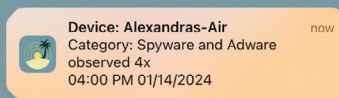

Schedule and block Internet access at any time for any device, user, or group.

From the moment you plug it in, Island not only protects your kids, it also protects your entire home from accessing a full range of malware.

With a quick tap, see what's been blocked, on whose device, and even drill down to see the exact URL.

Want real-time updates? Have Island send the notifications you want to receive to your phone.

Work-from-Home Essentials by Island

Hybrid work requires the same security and performance you need in any office, yet with the simplicity and flexibility required at home. Island provides these features to everyone, everywhere.

OFFICE PERFORMANCE AT HOME

Premium-grade hardware ensures your Zoom calls don't drop, your day trades are fast, and the days of rebooting are over.

MULTI-LAYER SECURITY

A no-configure, stateful firewall starts immediately upon boot up. None of your network information, including sites visited, is stored in the cloud. Your Island is truly an island.

AUTOMATED THREAT FILTERING. ALWAYS.

The Webroot database constantly monitors for hacking, phishing, BOTNETs so your network stays safe no matter who accidentally clicks on a bad link.

NOTIFICATIONS: CUSTOMIZABLE, REAL TIME

Receive immediate alerts about new devices attempting to access the network, devices having connection issues, and much more.

ALWAYS ON WITH DUAL WAN FAILOVER

Using dual-WAN connections via cable, cellular or satellite means no Internet outages during critical work sessions.

SEPARATE WORK FROM THE REST OF THE FAMILY'S ACTIVITIES

Easily set up VLANs and VPNs to isolate your work data from kids, guests, and the rest of your busy household.
