

Introductory Offer on our Low Disturbance Toolbar

Grange Machinery's [universal one pass system toolbar](#) is available to our first 10 customers at a discount rate.

Most common uses are:-

- Cultivator - Primary cultivations to remove compaction and to establish an early chit with a shallow pass cultivator e.g. Carrier, Joker etc.
- Drill - Strip sew OSR, to alleviate compacted areas on headlands, on the go whilst drilling cereals or to provide a full width lift when required in the field.
- Press - Loosen soil structure whilst keeping all weeds to the surface prior to drilling in autumn or spring.
- Independent – Standalone machine to loosen headlands or fields prior to any field work.
