

Kakadu Plum

Terminalia ferdinandiana

Anti-oxidants - Vitamins - Essential Minerals - Natural Antimicrobials

A Healthy Alternative

The world's richest source of Vitamin C

is ideal for a range of health, beauty and gourmet, beverage applications.

Wholesale Production

Kakadu Plums harvested wild and available worldwide whole or processed.

Product Description: Kakadu Plum – Whole Fruit & Soluble Powder Extract

• Our Kakadu Plum Soluble Powder product is derived from **Certified Organic Wild Harvested Fruit**. It is produced from Kakadu Plums, harvested from wild regions of the Northern Territory of Australia. We are the only certified organic harvest operation globally. The fruit is peeled. Screened and pureed before being chilled. The puree is then processed to remove the pulp; the remaining portion is blended with tapioca maltodextrin.

• The powder is milled and packed under a nitrogen atmosphere to aid storage. The powder is completely soluble when mixed with water. We use no extractive agent (i.e., no Butylene or Alcohol)

• The Kakadu Plum, also called the Gubinge, Billygoat Plum or Murunga; grows natively across the Top End of Northern Australia. The fruit has been a traditional source of bush tucker, antiseptic and a healing remedy for the Indigenous people across Arnhem Land for thousands of years. Today the trees are still in great abundance and come to fruit usually at the start of the dry season in May each year.

• **The World's Richest Source of Vitamin C (Stable)**

The Kakadu Plum has been identified world wide as the single natural food source with the highest vitamin C content on the planet. It contains over 7000mg of vitamin C per 100g of fruit - over 100 times the concentration found in oranges.

• **A Super Food**

There is no plant in the world that has the same level of vitamin C, anti-oxidants and bioactives, none of which are lost through our state-of-the-art processing methods.

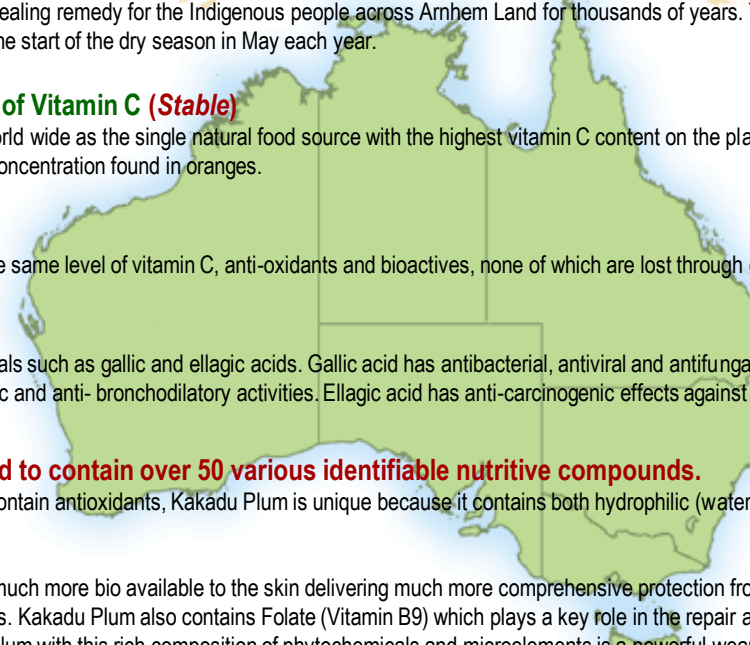

• **Medicinal Properties**

The Kakadu Plum contains phytochemicals such as gallic and ellagic acids. Gallic acid has antibacterial, antiviral and antifungal activities and also shows anti-inflammatory, anti-tumour, anti-mutagenic and anti- bronchodilatory activities. Ellagic acid has anti-carcinogenic effects against a wide range of carcinogens in many human tissues.

• **Kakadu Plum has been found to contain over 50 various identifiable nutritive compounds.**

While there are other natural fruits that contain antioxidants, Kakadu Plum is unique because it contains both hydrophilic (water soluble) and lipophilic (oil soluble) antioxidants.

• This combination of antioxidants are much more bio available to the skin delivering much more comprehensive protection from oxidative stress than fruits that are comprised of only hydrophilic compounds. Kakadu Plum also contains Folate (Vitamin B9) which plays a key role in the repair and synthesis of DNA, and can help to protect the cells from damage. Kakadu Plum with this rich composition of phytochemicals and microelements is a powerful weapon against premature aging.

The Australian native fruits, herbs and spices contain an exceptionally rich composition of phenolic compounds present at relatively high levels. With the observed multiplicity of phytochemicals, native fruits, herbs and spices may contribute greatly to diversify and enhance the health-maintaining properties of the daily diet.

PRODUCER 8005A

AUSTRALIAN CERTIFIED ORGANIC

Our Australian superfruits, bush botanicals and ingredients are organic/natural, eco friendly and extra special because the Growers and the Earth are treated with respect.

• Product Specification

Pack Size: 1kg, 5kg, 10kg
Product Code: WHSOL-KP101 **Soluble Powder Extract**
WH109-KP102 **Whole Fruit Powder**
Origin: **Product of Australia**
Botanical/INCI name: *Terminalia ferinandiana*

• Physical Standards

Flavor: Free from off flavors, typical of a mild tart sensation
Particle Size: Milled through 800um screen
Color: Cream to yellow
Odor: Free from off or objectionable odors

• Nutritional Information
