NEW FOR FALL 2018/2019 CODING for KIDS & TEENS

The Coding Program class provides a rich and engaging environment that inspires children and teens to innovate, think critically, and create with technologies on the fringe of our hi-tech culture.

Children will experience how coding can help develop logical thinking, creative exploration, and critical reasoning – used in almost every field across STEM (Science, Technology, Engineering, and Math).

By getting “under” the interface, we learn about the processes that control it. As the developer of their game, students find their innovative potential through our curriculum as they progressively master their skills in Python, GML, C#, and C++ on the GMlegacy, Unity, Unreal, and Visual Studio engines.

Note: A laptop with WiFi is required for this class. Otherwise a rental can be arranged.

- SINGLE CLASS**
 English or Math \$480
 Writing or Science \$540
 Semester Math \$570
- DISCOVERY CLASS PACK (2 Classes)**
 English + Math \$940
- GENIUS CLASS PACK (3 Classes)**
