

FAQ:

What course should I sign up my kid to?

There are 4 levels offered at **Robo-Geek** in our Milton and Brampton locations. Each level offers a balanced curriculum for students to experience both hardware (robotics) and software (coding). We have designed the courses in such a way that students will learn to integrate knowledge while gradually introducing terminology and theory. For more information, click the **red button** for detail information.

How do I register my kids?

It's easy. First select location you are interested, select course and preferred time, answers a few questions and pay online. Click on the **blue buttons**

Are all the courses offered in all locations?

Yes. We will offer all courses in both of our locations. Milton was established in 2015, so all courses are now running and available. Brampton just opened in the summer 2017, so we will start with Level 1 courses and progress students accordingly.

I am interested in a free assessment, how do i book one?

Free assessments are 15 minutes long. We will evaluate students and give you recommended level based on demonstrated knowledge. If you are interested please send us an e-mail or call us to book appointment.

If my kid misses a class, do you offer catch-up classes?

Yes we offer 1 catch-up class per session per student. A couple choices will be offered but catch-up classes must be completed within the session. No catch-up class will be offered for the last class in the session.
