☒

Hi Russ,

Are you (Siobhan) still looking at my case? Aside from the concerns Siobhan has with Rubio's staff emails, which are important points to be aware of, more concerning is the very likely role of the FBI in covering this up, if not perpetrators. I gave her some more information (below), regarding when I was up North and went to Senator Nelson's DC office. Senator Nelson is the person I originally reached out to. That office ended up referring me to Rubio (for all the "good" that did).

Aside from my co-worker at UM Susanna Arias Morales' pointed comment to me that she had a relative in the FBI, I have not received one call back from them about these horrid, documented, concerns (the 40 pages are quite scary). While at Senator Nelson's office in DC there was obviously an attempt to obfuscate and cover-up by the FBI, and not deal with me. (A distinct change from initial concern to avoidance during that visit.) I have all my paperwork from Nelson's offices including more sent to and from his office that day.

Because the nature of the CIA is much more secretive, which should not be allowed, they are scarier than the FBI in my opinion. I know how you feel about them, and probably the FBI as well? We have seen what certain employees of the FBI are capable of, in the past with Cointelpro, more recently with Strzok, Page, etc. I am sure you agree that partisanship by any of these law enforcement/Intel orgs is very dangerous, regardless of the issue, or side they take (this time...). Of course the CIA has (still?) the second largest hub (to Langley) at UM. This hell could also be them. State?? Could be ... the Inspector who wanted an audit (State) -- but that was quashed... I also have names of the Boynton Police I have spoken/mailed with regarding the murder of Joan M, who also falsely told me they had done an investigation ... Plenty of leads --- Who is Arias' FBI relative???

The other concerns are highlighted yellow in the second email from me just below. Patient protection is another very important issue, and let's not forget the vile threat against me by Herna... I went into Canada while back up North (MD visits) after the threat, to check my labs there ... my altered tumor markers and lab forms were reported to oversight agencies here. Patients MUST have more protections...

Thanks again, Judy
