COVID / Visitation Update

Greetings from Midway Nursing Home!

Unfortunately, as part of our staff and resident testing, a positive staff case was reported. No residents have tested positive and all remain asymptomatic.

Pursuant to CDC guidelines, visitation is on pause until another round of testing for all residents and staff is conducted with no additional positive cases found.

Affected units are on precautionary isolation and the families of those units were notified yesterday. Once this round of testing is complete and there are no additional positive cases, the unaffected units may resume visitation. We are taking every step necessary to keep the residents safe.

We will keep you updated via recorded calls and on our website at www.midwaynursinghome.com

We thank you for your patience and hope to see you soon.
