

## Preliminary Pre-Claim Prep

The delay of the Pre-Claim Review Demonstration shouldn't stop your agency from doing what you can now to make sure you're fully prepared. You are familiar with the documentation required but you may not be ready for the intense scrutiny the details of your claims will receive once participation in this demonstration becomes a requirement.

MJS is currently offering a Preliminary Pre-Claim Prep package to guide your agency in the right direction. This preparation will give you the feedback and training necessary to assure you are not hit with non-affirmed decisions when the program goes live.

### HOW IT WORKS

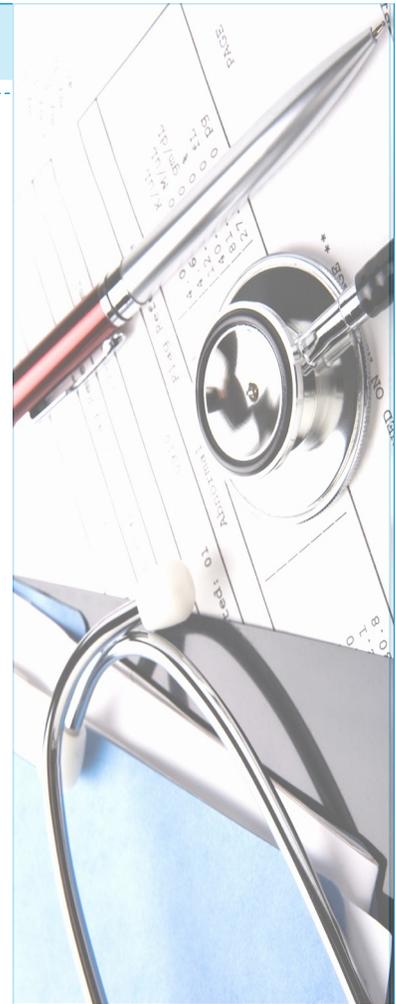

Send our experienced and knowledgeable staff 10 claims *prior* to submission for physician signature. Our compliance RNs will check the documents for all of the required eligibility and coverage standards. You will receive a detailed report that explains which areas need work. The assigned RN will then provide a personalized educational training session via phone conference or webinar in which we will go over the results of the review in detail and how you can improve your readiness. It's that simple!

MJS will work diligently in order to ensure you have all the necessary information present in your documents to be able to not only survive this process, but to capitalize on it. The claim reviews will take up to 10 business days and the personalized training will be provided immediately following the review.

The Preliminary Pre-Claim Prep is a specialized offer based on our Pre-Claim Review package. It is the first step in which the OASIS, Face-to-Face, and Therapy Evaluations are reviewed to make sure the necessary/required information is present in order to meet coverage requirements. The difference is that for the Preliminary Pre-Claim Prep, we survey a wider selection of claims giving your agency a better idea of the discrepancies present and allowing you a better chance to correct and perfect your documentation. That, bundled with the personalized educational training and overview, will fully prepare you for the demonstration project. The key to capitalizing on this tedious demonstration is to make sure everything is in order to avoid non-affirmed decisions up front. MJS can help you do just that.
