

# COOPERATION

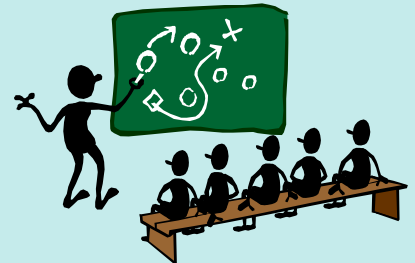

**...acting together, in a coordinated way at work, leisure, or in social relationships, in pursuit of shared goals, the enjoyment of joint activity, or simply furthering the relationship.**

**...the key to a number of problems, from social skills training to inter-group prejudice.**

**...requires special social skills....to help people establish and sustain relationships... influence others in acceptable ways....and to synchronize performance, which usually means taking account of their needs.**

**Michael Argyle, 1991**
