# New Patterson Medical Patient Monitoring Alarms

**NEW Patterson Medical Alarm Monitors.** For use with the Patterson Medical wheelchair sensor pads and bed sensor pads featured on the next page. The unit is easy to move from wheelchairs to beds with the included strap or optional bed bracket clip. State-of-the-art technology ensures patient safety and meets required protocols. These monitors, along with new Patterson Medical pads, activate an alarm when a patient stands up or shifts weight off pad. Unique status lights give caregivers peace of mind.

- Sensor Pad Connect (green flash): Indicates that the alarm and pad have been connected and the alarm system is ready to use. Green flash goes off when pad is lost, not there or faulty.
- Low Battery Alert (amber flash): If light is flashing, replace battery immediately.
- Alarm Alert (red flash): Patient has moved off the pad and needs assistance.
- Reset button needs to be pressed 3 times in 2 seconds to reset alarm. This helps to prevent patient tampering.
- Includes a mounting strap, mounting hardware and a 9V battery.
- Economy and Standard Alarm Monitors have two tones to choose from and the Deluxe Alarm Monitor has one tone and a voice record feature.
- Standard and Deluxe Alarm Monitors have a switch inside the battery compartment that can be positioned to NC to activate the nurse call feature. Alarm does not sound in room, but will signal at the nurse's station. (Nurse call-cord not included).

**0815-62-537 Economy Alarm Monitor \$35.95**  
**0815-61-497 Standard Alarm Monitor \$43.95**  
**0815-61-505 Deluxe Alarm Monitor \$59.95**  
**Optional Accessories**  
**0815-61-612 Alarm Monitor Bed Bracket Clip \$6.95**  
**0815-61-620 AC Adapter \$9.95**

## See next page for Alarm Sensor Pads

**NEW Patterson Medical Magnet Alarm.** Easy to operate, reliable and economical, too. Used on chairs with the cord attached to patient's clothes. The alarm is activated when the cord is pulled as a result of the patient starting to stand. The pull string has a 1" diameter magnet on one end and a spring-loaded metal clip on the other. Alarm triggers and red light is illuminated when magnet is pulled away from the alarm. Included for attachment of the unit is a spring-loaded clip for easy attachment to a wheelchair.

- The alarm unit measures 5" x 2" x 1.25", making it small and discreet.
- Durable design – doesn't need an expensive rubber protector. Passed drop test by independent lab simulating 500 drops.
- A volume adjustment switch inside the battery compartment can be set at high (105dB) or low (90dB).
- The included 9V battery has an extra secure fit. When the alarm is dropped, the battery does not fall out of the alarm and fly across the floor. Also, makes it more difficult for patients to disable the alarm.
- Red, low battery light flashes when battery is low.
- Tool free battery door – you won't have to search for a screwdriver just to change the battery.
- The length of the pull cord can be adjusted up to 30" so you can determine how far the patient is able to move without setting off the alarm.

**0815-61-489 Magnet Alarm \$16.95**  
**0815-61-604 Replacement magnet, clip and cord sold separately (Pkg. of 5). \$15.95**

# New Patterson Medical Alarm Sensor Pads

**Patterson Medical Alarm Sensor Pads.** Vinyl-covered, water-resistant pads activate the alarm monitor when the resident rises or moves off the pad. Sensor pad set up instructions are printed right on the pad as well as a location to record the initial date of use.

Item No.	Chair Sensor Pads	Price
0815-61-513	10" x 15", 90-Day	\$14.95
0815-61-521	10" x 15", 180-Day	\$18.95
0815-61-539	10" x 15", 1-Year	\$22.95
Item No.	Bed Sensor Pads	Price
0815-61-547	10" x 30", 90-Day	\$20.95
0815-61-554	10" x 30", 180-Day	\$26.95
0815-61-562	10" x 30", 1-Year	\$33.95
0815-61-570	20" x 30", 90-Day	\$24.95
0815-61-588	20" x 30", 180-Day	\$31.95
0815-61-596	20" x 30", 1-Year	\$38.95
<b>90-Day Sensor Pads</b>	Ideal for hospitals and patients who have a short-term stay	
<b>180-Day Sensor Pads</b>	Useful for most rehab stays because of its durability	
<b>One-Year Sensor Pads</b>	Long-term stays or at-home use benefit from this most-durable pad
