

THE GATES OF EDEN

SACRED GEOMETRY OF THE PROMISED LAND

If the dimensions of the New Jerusalem are outlined with the center focal point being the Temple Mount in Jerusalem, then the circumference will cross Mt. Ararat and Mecca. If a 2nd circle of the same size is juxtaposed on the very same points to intersect Mt. Ararat and Mecca with Jerusalem and Mt. Hermon. This Sacred Geometry creates a Vesica Piscis. There is an approximated inclination of 11 degrees of the Vesica Piscis that is in alignment to the 2 Gates of Eden, Gibraltar and Hormuz. If the 'Gates' are a natural delineation of the borders of the Biblical region of Eden, they are in approximate phi ratio proportions. When the phi ratio is superimposed starting from Gibraltar, there are several unique associations to spiritual and ancient sites. The phi ratio has Jerusalem associated to Mecca and is corresponding to the Vesica Piscis.

Φ THE GOLDEN RATIO
It is the 'Signature of the Creator'.
It is seen in math, nature, the arts and
the Human Form. It is when 2 quantities
are in the golden ratio if the ratio of the
sum of the quantities to the larger
quantity is equal to the ratio of the
larger quantity to the smaller one.

7 И тогда Иисус снова сказал: «Истинно вам говорю, что Я и есть те ворота для овец. 8 Все, кто приходил до Меня, — воры и грабители, и овцы не слушались их. 9 Я — эти ворота, и каждый, кто войдет через Меня, спасен будет. Он войдет и выйдет, и найдёт всё, что ему нужно.»
