DPPOA Board Submission

for

Bonnie C. Blades

My name is Bonnie Blades and I've been in Drum Point since I bought my house in 2006. Although here for over a decade, I still split my time between Bethesda and Lusby. I have met many wonderful neighbors over the past 10+ years. Those of you I have not yet met may actually know me as the woman who is being walked by the St. Bernard named Jolly (or previously Saint Nick).

My educational background is in liberal arts, with masters degrees in both linguistics and computer science. I have had a long career (primarily in the defense sector both in government and private industry), in the design and programming of applications software, systems analysis, business process analysis and engineering, commercial product development and support, and customer presentations. I retired as a senior systems engineer from The MITRE Corporation, McLean, VA, in 2011.

Drum Point is a very special place. I have a great respect for the Bay and the history of our surroundings. It is my goal to ensure that our beautiful Drum Point community continues to be a clean, safe, and family-friendly environment. I am a pragmatic problem solver and would consider it a privilege to serve you.

Sincerely,

Bonnie C. Blades
