

I have gone to specialists and was diagnosed with vertigo after having 2 neck surgeries (C5-6 and C6-7) within 14 months of each other. No doctors seemed to be able to help me with my major dizzy spells.

Upon arriving at BalanceMD (prescribed by my family doctor) I was a little skeptical. Upon having additional testing, I was then sent to their in house PT. We went thru many exercises and I now do my own PT 3 times/day and my dizziness is GONE. I continue to do my therapy early morning, mid-day and evenings.

The entire staff is very pleasant, helpful and compassionate. Thank you for what you have done for me, I am so grateful.

Timothy Clark
