LIVE TO PROTECT

2017

Live to Protect - It's our mission and it is the core of everything we do.

In August 2016 SENTRY Products Group LLC was created to focus on our existing brands which included Scopecoat, Slideboot and Sentry Solutions and to provide a platform to introduce new product categories. On the following pages you will see the first new products living under the SENTRY banner and our identity statement – “Live to Protect”. You will also see a common theme in all the products as they focus on the transport, storage and protection of weapons and gear.

We were fortunate to add many new dealers and OEM partners during the past year. While we kept pace with deliveries, 2016 production exceeded planned factory resources. To accommodate this growth, we created a new production facility, located in Boise Idaho. This expanded facility will support all USA manufacturing, global sourcing and distribution. This investment is a tremendous step forward and we are extremely proud to be creating jobs in the USA.

What can you expect from SENTRY Products Group in the coming year? We will continue to drive innovation with our product development team. We will create new products, not by living in a vacuum but, by listening to the needs of our end users. We will build marketing resources to enhance the end user experience and to support the efforts of our distribution partners. We will continue expand our product categories through development, or acquisition to meet the needs of the market.

From the Team at SENTRY Products Group, thank you for your support and confidence. We look forward to another great year.

Sincerely,

A handwritten signature in black ink, appearing to read 'T Naughton'.

ULTE BAGS & PACKS

(ULTRA LIGHT TRAVEL EQUIPMENT)

1080 TECHNOLOGY

Fast Secure and convenient Sentry's patent pending 1080 technology provides a flexible lightweight solution to mounting pouches, tools and accessories in horizontal, vertical and diagonal orientation.

1080™ TECHNOLOGY

SENTRY™ TUMALO™ PACKS

The Tumalo pack offers 2,300 cubic inches of storage capacity. The three storage compartments are accessed through dual slide YKK zippers. Main compartments include hydration access port, integrated laptop retention, mesh organizer and key lanyard. Front panel includes quick access slash pocket and integrated Hypalon panel with patent pending 1080™ technology providing secure mounting points for pouches tools and accessories in a vertical, horizontal and diagonal orientation. Airframe technology combined with padded shoulder and a removable waist straps support carry comfort.

PATENT PENDING

TUMALO EXTREME

- Lightweight 420D ripstop with a water resistant TPU laminate
- Fully Seam Sealed
- YKK Waterproof Zippers

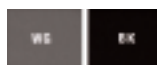

21WT01__

Available Colors: WG, BK

MSRP \$289.99

TUMALO AIR

- 420 D Ripstop Nylon
- YKK coil zippers

21UL01__

Available Colors: WG, BK

MSRP \$194.99

ULTE TRAVELER

WATER RESISTANT

Constructed of weather resistant 420D nylon ripstop with TPU laminate. This fully seam sealed bag features YKK waterproof zippers for protection against the elements. The clam shell design opens flat for quick, convenient packing. Three external pockets offer easy access to additional storage. Padded Handle, removable shoulder and pack straps included.

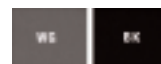

20WP01__ MED 24" L X 12" W X 9" D = 3850 CUBIC INCH

MSRP \$299.99

20WP02__ LRG 27" L X 14" W X 10" D = 5500 CUBIC INCH

MSRP \$349.99

Available Colors: WG, BK

ULTE DUFFEL

WATER RESISTANT

Combining 420D ripstop with TPU laminate, YKK Waterproof zippers and roll down construction the duffel offers protection in all weather conditions. Large open top provides easy loading and unloading of gear. The 5,600 cubic inches in capacity makes this the perfect multiday bag. Front and dual side access pockets for additional wet/dry storage. Padded Handle, removable Shoulder and Pack Straps included.

CLEANING SOLUTIONS

Sentry Solutions understands that your guns and gear are very important to you. Performance is paramount. Reliability is crucial. If your hi-tech gear jams, disaster may strike. If high value collectables are damaged in storage, your investments diminish. Protection is the key.

THE PROBLEM

We looked at the major causes of failure - 1) Dirt, dust and carbon cause fouling during operation of weapon systems. 2) The potential for pitting and rusting of metals during storage. If you live or work in an area of high humidity or saltwater the problems multiply. To combat these failures, we have been locked into the endless cycle of cleaning and lubing with oil based products. However, as soon as oils are applied the cycle begins again, since it is the oils that attracts and holds the contaminants.

THE SOLUTION

Our goal was simple – End the cycle of cleaning and protecting with oils by developing a technologically superior way to lubricate and protect guns and gear. After years of extensive research, we created a dry lubrication system, that cleans and protects. In fact, Sentry Solutions' oil-free gun care practically makes firearms self-cleaning!

HOW IT WORKS

By simply replacing solvents, patches and "wet," sticky gun oil with dry non-toxic, oil-free, lubrication and corrosion protection that bonds to the metal, guns and gear operate better. Our products provide a micro-bonding shield making metals non-stick, leaving nothing to attract and hold dirt. Performance, reliability and accuracy are enhanced; cleaning becomes as simple as brushing off and re-lubing. Sentry Solutions' products will not thicken in the cold or thin out in extreme heat, providing protection in even the harshest environments. You will find that even after thousands of rounds, guns look like they haven't been fired and residue is just blown away.

TUF-GLIDE™

Oil-free technology provides a revolutionary upgrade from oil and silicone rags; delivers lubrication and protection for today's firearms, knives, tactical gear and collectibles. Quick cleaning on your gun bench, at the range or in the field. Available in convenient cloth and bottle applications.

- Great for all conditions, metals and finishes, safe for wood and plastic
- Slick action in any temperature – won't thicken from cold or thin out from heat
- Keeps guns and gear clean, operating smoother, and lasting longer
- Micro-bonded shield
- Prevents fingerprint, tarnishing and dulling
- Gives metal a non-stick barrier
- Inhibits rust
- Displaces moisture
- Grit-free reliability

*Lubrication and
Rust Protection
for Firearms, Knife
and Tool Care.*

91022	14ml / ½ oz	\$11.99
91023	118ml / 4oz	\$16.99

SMOOTH-KOTE™

Innovative replacement for gun oils and CLP's. Fast-drying firearms lube and bore treatment. Protects internal surfaces against friction, fouling, and wear. Micro-bonds to metal for excellent lubrication from -54°C/-65°F to 343°C/650°F.

- Non-stick shield repels dirt, eliminates grime
- Extreme fouling reduction enhances accuracy, bullet velocity and reliability
- Bore treatment without the build-up, no need to adjust charge weight
- Makes cleaning your gun simple, just brush off and re-lube

91070	14ml / ½ oz Precision Applicator	\$10.99
91030	56ml / 2oz Jar	\$16.99
91090	224ml / 8oz Bottle	\$29.99

HI-SLIP GREASE™

Lubricates, waterproofs and prevents rust, even in saltwater. All the benefits of oil but stays put – will not migrate from -54°C/-65°F to 343°C/650°F. Synthetic blend exceeds mil-specs for moly grease.

- Excellent for silky smooth actions
- Great for locking lugs, easier lock-up
- Prevents galling even under high loads and extreme conditions

91050	12cc Syringe	\$ 9.99
91051	56ml / 2oz Jar	\$12.99

BP-2000 POWDER™

Unique dry lubricant for trigger jobs, fine-tuning feed ramps, bores, bolts and slides. Made from pure powdered, passivated molybdenum disulfide with natural micro-bonding to metal.

- Reduces coefficient of friction, smoothes and lightens trigger pulls
- Gets rid of trigger creep for the crispest release
- Oil-free and dry surfaces are non-stick – clean by brushing off and re-lubing

91040	3g / 0.1oz	\$10.99
-------	------------	----------------

Total Protection Kits

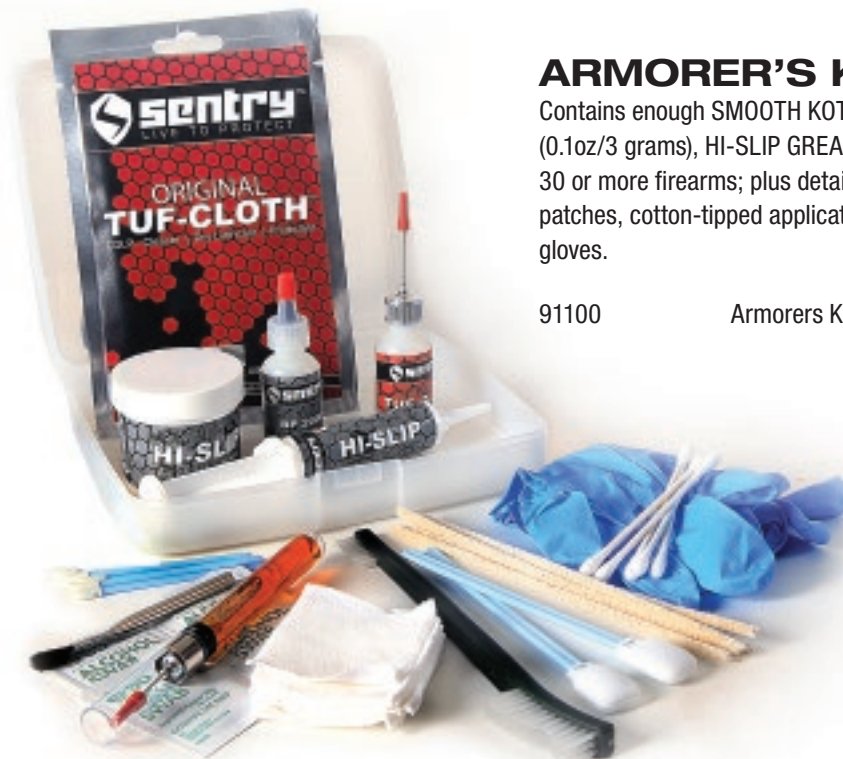

GEAR CARE KIT - FIELD GRADE™

Compact, easy to pack for the range or the field. Great for field care of guns, knives and tactical gear. TUF-CLOTH and TUF-GLIDE for oil-free lubrication and corrosion protection, lint-free cleaning tools plus GATCO's Super Micro Ceramic Sharpener. A great combination of revolutionary lubrication, protection and versatility

PRODUCT SPECIFICATIONS

Made in USA Scopecoat®, Binobib®, XP-6™ Flak Jacket, SlideBoots™, BarrelBoots™, and BoltBoots™ are constructed of the highest quality neoprene with nylon laminate. Neoprene is a material commonly used in wetsuits, conforms to the shape upon which it is placed. Its superior composition assists in repelling moisture and condensation away from your scope. Nylon offers the resiliency of movement while repelling dirt and dust. This combination helps to protect your optics from the elements and from damage while storing or transporting your weapon.

SCOPECOAT® CARE & MAINTENANCE

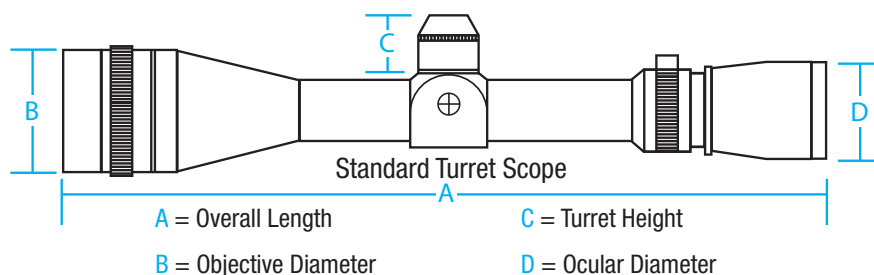

This neoprene product is not designed to be completely WATERPROOF; but is extremely water resistant. Your Scopecoat® BREATHES. Scopecoat® actually draws moisture and condensation away from your scope. You may temporarily waterproof your Scopecoat by using any commercial spray-on water repellant, following the manufacturer's instructions. If your scope is going to be exposed to extreme weather conditions such as rain, wet snow, etc., spray your Scopecoat® exterior generously with water repellant. Allow the Scopecoat® to dry completely before placing on your optic. After use, if excessive soil is present machine wash in warm water with a mild detergent. Do not use Bleach or fabric softener, as the softener may leave a residue that can transfer to your lenses. Turn the Scopecoat inside-out and air dry for approximately 12 hours. Do not place in the dryer! Be careful not to fold or bend your Scopecoat. Creasing may cause indentations or a permanent break in the neoprene. If this happens, the damage may sometimes be resolved by washing the Scopecoat®.

SELECTING THE CORRECT SIZE

Scopecoat® protective covers fit a variety of optics. When choosing the right size Scopecoat® measure the overall length of your scope in inches and the objective lens in millimeters.

Scopecoat® stretches to custom fit to your optic while providing maximum protection. Our standard Scopecoat® cylindrical covers can stretch approximately 1 to 1.5 inches beyond the stated size. For example, a 10.5" cover may stretch from 11.5 inches to almost 12 inches. With this in mind, select the right size for either a relaxed or snug fit.

To determine what size Scopecoat® you will need for cylindrical type scopes, follow the steps below.

The image above will help to determine which Scopecoat® protective covers will best fit your scope.

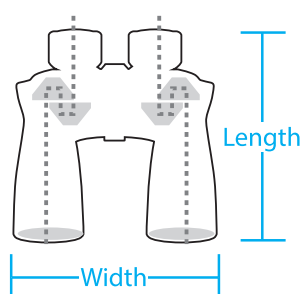

MEASURING YOUR OPTIC

Optic sizes are listed by overall length and objective sizes. The length is measured in inches and the objective is measured in millimeters (mm).

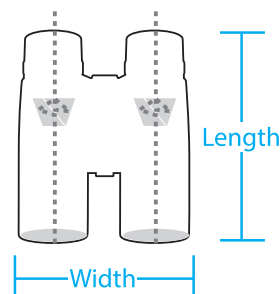

1. Measure the overall length of the scope, including the size of the sunshade, if applicable.
 2. Measure the objective lens in millimeters. The objective end of the scope is the end that you see out of, or the end furthest from your eye.
 3. Measure the turrets, (These are the adjustment knobs in the center of the scope, i.e.: Windage, Elevation, and, or, Parallax knobs). We consider turrets that are .75 inches or more to be "Tall Turrets," for those models we suggest the XP-6™ Flak Jacket to maximize coverage.
- *Standard Scopecoat® protective covers are designed to fit scopes with standard height turrets.*
 - *XP-6™ Flak Jacket Scopecoat® protective covers are designed to fit scopes with tall or tactical turrets.*
 - *Scopecoat® is available in 2 thicknesses: Standard Scopecoat® in 3mm, and our XP-6™ Flak Jacket in 6mm thicknesses.*

MEASURING YOUR BINOCULARS

1. Type: Determine if your Binoculars are Porro Prism or Roof Prism design.
2. Length: Measure the distance from the ocular (eye piece) to the objective.
3. Width: Measure the distance across the closed hand-band (where you hold the binoculars).
