- Building Inspection Services

## DIFFERENTIATORS

- We take pride in building relationships with our clients
- We understand the importance of partnering and developing a great team
- Our company is built on Integrity, Community & Trust

## PAST PERFORMANCES

**Veteran’s Parkway – Phase 1 (Jeffersonville and Clarksville, IN)** – A new five-lane urban roadway with a Two-Way Left- Turn Lane (TWLTL) which serves as a north side connection between the City and Town. The 1.5 mile long project created a new interchange with I-65, which was constructed by INDOT. A new bridge overpass was constructed on a horizontal curve over U.S. 31 and the L&I Railroad and a two-way Connector Ramp was used to provide access to and from U.S. 31.

**Moser Knob Road - (Floyd County, IN)** - JTL provided design and construction inspection for the reconstruction of Moser Knob Road from approximately 1,450 feet north of Loriann Boulevard to approximately 3,500 feet south of N. Skyline Drive, a total distance of approximately 4,250 feet. Work included excavating the existing pavement area to rock, benching, back- filling and reconstructing asphalt over aggregate pavement in some areas, and scarifying and resurfacing in other areas.

**Lewis and Clark Parkway - (Clarksville, IN)** - JTL provided survey, design, and specifications for the construction of approx. 8800’ of widening, patching and a structural overlay. Former S.R. 131 (renamed Lewis & Clark Parkway) was widened from a rural four-lane road with shoulders to an urban six-lane road with raised medians with landscaping in some sections. Improvements also included curb and gutter, sidewalks, decorative street lighting and landscaping behind the sidewalks on both sides.

## COMPANY DATA

**Duns:** 050775426  
**CAGE Code:** 36RW2  
**NAICS:** 541330, 541370, 541320
