

REVELATION 12 SIGN WEDDING RING

ANNULAR SOLAR TYPE - 2ND GREAT AMERICAN ECLIPSE - OCTOBER 14, 2023

EVENT	DATE	CONSTELLATION
1-Great American Eclipse #1:	August 21, 2017	Leo
2-Great American Eclipse #2:	October 14, 2023	Virgo
3-Great American Eclipse #3:	April 8, 2024	Pisces

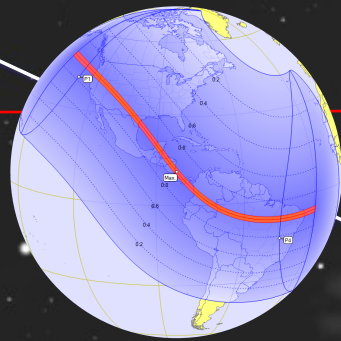

The Question of how 'Rare' was this Annular Eclipse occurring at this Place and Time in Virgo, was made by Robert 'Bob' from the Online Blog: Revelation 12 Daily. The following Calculation was made by Stephan, also from the Revelation 12 Daily Blog.

'The Probability is only 2,25 % for an Annular Solar Eclipse in the Hand of Virgo in 6000 Years. It is because the Probability of an Annular Solar Eclipse is the following.'

$1/730 \times 1/365 = 0.000002739726$ in a given Year in 6000 Years
(Probability in 6000 Years) = **2.25 %**

'So it is even confirming that it is very unlikely!!! In other words: An annular Solar Eclipse in the Hand of Virgo occurs every **26,645,350 Years**'.
