

# ALLIED GIS

We Map the World.

ALLIED GIS is in tune with the GIS implementation challenges facing ESRI users today. Working as a team with our clients, ALLIED offers the most innovative solutions and reliable results to these challenges.

### DATA

ALLIED provides spatially-enabled databases using ESRI Geo-Database technology (10x). These datasets can be integrated with RDBMS and/or internet solutions. They can be viewed, queried and printed using ArcView, ArcMap, ArcGIS Online or ArcGIS Server.

### APPLICATION SOLUTIONS

ALLIED can provide "out of the box" solutions or create user-friendly custom applications on any feature set:

- Pipeline / Utilities
- Land Records / Land Ownership / Leases
- Transportation
- Hydrography / Geology / Geothermal
- Archaeology / Cultural / Historic Locations
- Alternative Energy Solutions
- Flood Hazard Location and Information
- Emergency Response / Vehicle Tracking

ALLIED Clients range from private organizations, to military, to federal government. Our projects include:

- ArcGIS Server and ArcGIS Online Implementation
- Web Mapping / Host & Post Solutions
- Environmental Impact Statement Mapping / NEPA / EA
- Database Integration and Conversion
- Data Organization
- Vegetation Classification from Imagery
- Alternative Energy Locations and Potential Output
- Custom Maps
- Spill Response Mapping

### TRAINING

ALLIED GIS understands that clients often just need basic training. With over 70 years experience, ALLIED's staff has developed an easy to understand training program for non-technical personnel. Training can include both convention and customized methods—whatever best suits your needs. We also offer Trimble GPS training and ongoing support.

To learn more about how ALLIED GIS can help you, please call Gail Morrison +1.907.333.2750 or visit [www.alliedgis.com](http://www.alliedgis.com).

## ALLIED GIS SERVICES

- ArcGIS Server Implementation
- ArcGIS Online and Open GIS
- Emergency Response Mapping
- Application Development
- Data Organization using SDSFIE
- Map Production
- Database Design and Implementation
- Planning Projects (NEPA/EIS)
- Imagery Georeferencing, Mosaicking & Feature Extraction
- Electronic Airport Layout Plans
- Water Resources Inventory Analysis
- Asset & Facility Management
- Land & Hydrographic Surveying
- Diving Inspection—3rd Party
- Data Mining & Gap Analysis
- Data Conversion
- Aerial Photography / LIDAR
- GIS Training & Ongoing Support
- GPS Training, Collection, & Support
- E-GIS, ArcSDE, SQL, Oracle
- GIS Return on Investment Analysis
- Alternative Energy Location Analysis
- GIS / IT / Access / XLS Programming

## ALLIED GIS CLIENTS (partial list)

- Brooks Range Petroleum Corporation
- Alaska Joint Pipeline Office
- State of Alaska—Dept. of Transportation
- Alaska Army National Guard
- Bratslavsky Engineering
- ARCTOS
- PND Engineering
- Michael Baker Jr.
- Bureau of Reclamation
- NPS
- NASA
- NOAA
- USFWS
- BLM
- Black & Veatch
- USACE
