- custom design help available at additional cost

NEW CUSTOM PRINTED DECORATIVE DIFFUSERS

Norton Industries, Inc. is now offering custom printed decorative diffusers! Add logos, images, photos, and patterns to your light fixtures.

Our decorative diffusers drop into standard fluorescent light frames, bringing beauty and inspiration to the space while diffusing light and reducing glare. These translucent plastic diffusers are shatterproof and fire-rated. They are nearly unbreakable, meets ASTM E-84 standards for Class A fire-rating, and NFPA standards for flame and smoke spread. Unlike other shatterproof, fire-rated lenses, our Decorative Diffusers have UV inhibitors added to prevent yellowing over time.

Just provide your art: raster image (.jpg, .png, .tiff) with minimum 300 DPI or vector image (.ai, .svg, .eps) and a one time \$49 set up fee. Need help with your art? We can provide custom design services for a nominal fee - please contact us for details.

Note: You must provide written permission for use of copyrighted logos and images.

We also offer an extensive selection of over 200 standard decorative diffuser designs. Please visit our website to view the full catalog.
