

## When Day Turns into Night

Over the horizon,  
You can see the light  
The coming of a new day  
A welcome sight  
Relentless in its efforts,  
Its energy and its might

Rising to its height  
But, it's not long before you see it sinking  
And realize its' plight  
Nothing lasts forever  
And time is getting tight

And day turns into night

The shadows start crawling  
And you see the fading light  
As the evening falls,  
The sun gives up the fight  
Suddenly the moon and the stars  
Provide the only light

And day turns into night

Black or white

Wrong from right

Escaping like a kite

Fight or flight

The answer is not quite

The future can be bright

Take another bite
