

WOLA Lake Treatment Schedule, 2020

Marine Biochemists, our lake treatment specialists, will be evaluating and treating our lake, as needed, for weeds and algae **on the following Mondays** again this summer. If weather is not optimum for treatment on these Mondays, they will treat on Tuesday of the same week. If both dates are rained out, they will continue to push one day at a time until they can treat.

IMPORTANT: Watch our Timely Announcements updates on the WOLA website at www.wolamembers.com for delay treatment date updates and for schedule changes!

Restrictions: There are no swimming or fishing restrictions with the chemicals they are using. However, for members who live on the lake, DO NOT water your yards, gardens or plants with lake water for three days after the treatments to avoid plant and grass kill.

Lake treatment Dates for 2020 (all Mondays unless rained out, then, following day):

May 11 (Algae only)

May 19 (special second algae treatment)

June 1

June 15

June 29

July 6

July 13

July 27

August 10

August 14

September 7
