

# CUSTOM BUILT PERSONAL & CORPORATE COMPUTERS & SERVERS.

- We can customize each system to your specific requirements & budget considerations.
- We will come to your site to evaluate your needs and help design a solution that works.
- We use only quality, name brand parts and our systems are bench tested at every level.
- We build a wide range of systems including desktops, laptops, notebooks, and gaming computers.
- We'll design & build a server that fits your particular working environment and network requirements.
- If required, we'll install & configure the server software & set up your network for you.
- We don't stop at building it; we can come to your location and integrate the server with your existing network structure, including the workstations.
- Now available, Burl-Oak Gaming Computers, from entry level to advanced.
