Permission to Share Images of Your Teeth

During your examinations and/or procedures, images of your teeth may be captured in order to show the close-up appearance of your teeth to you, the dentist, and in some cases your insurance company. Some of these images are chosen to be shared on our website and/or social media sites in order to illustrate a dental condition and/or the results that can be achieved through treatment. The images will be edited to remove all distinguishing characteristics that are not necessary to adequately view the teeth; e.g., eyes, nose, chin, etc. It is important to realize that some prominent characteristics may still allow others to identify you. The images may be posted on our website www.gillisanddaltodontistry.com, and/or our social media sites; i.e., Facebook and Twitter. The refusal to allow your images to be posted on the internet, will in no way affect the quality or outcome of your treatment. You may withdraw your consent at any time in writing. We will then remove your pictures from our website and/or social media sites, however full recovery of the image may not be possible once it has been made public.

We would greatly appreciate your assistance in helping us to educate our current and prospective patients on the benefits of dental treatment.

I, _____ DO hereby give Gillis & Dalton Family Dentistry PLLC permission to share images of my teeth on their website and/or social media sites.

I, _____ DO NOT give Gillis & Dalton Family Dentistry PLLC permission to share images of my teeth on their website and/or social media sites.
