

PUDDLEDUCKS Nursery and Pre-School

FOOD, NUTRITON AND DRINK POLICY

Aim

Our setting is a suitable, clean, and safe place for children to be cared for, where they can grow and learn. We meet all statutory requirements for food safety and fulfil the criteria for meeting the relevant Early Years Foundation Stage Safeguarding and Welfare requirements

Objectives

- We recognise that we have a corporate responsibility and duty of care for those who work
 in and receive a service from our provision, but individual employees and service users also
 have responsibility for ensuring their own safety as well as that of others. Risk assessment
 is the key means through which this is achieved.
- We follow Kitchen Safety And Hygiene policy for general hygiene and safety in food preparation areas.
- We provide nutritionally sound meals and snacks which promote health and reduce the risk
 of obesity and heart disease that may begin in childhood.
- We follow the main advice on dietary guidelines and the legal requirements for identifying food allergens when planning menus based on the four food groups:
 - meat, fish, and protein alternatives
 - milk and dairy products
 - cereals and grains
 - fresh fruit and vegetables.

- Following dietary guidelines to promote health also means taking account of guidelines to reduce risk of disease caused by unhealthy eating.
- Parents share information about their children's particular dietary needs with staff
 when they enrol their children and on an on-going basis with their key person. This
 information is shared with all staff who are involved in the care of the child.
- Foods provided by the setting for children have any allergenic ingredients identified on the menus.
- Care is taken to ensure that children with food allergies do not have contact with food products that they are allergic to.
- Risk assessments are conducted for each individual child who has a food allergy or specific dietary requirement.

Food preparation, storage and purchase

General

- All staff have up to date certificated training on food safety.
- Cooks refer to Eat Better, Start Better (Action for Children 2017) and Example menus for early years settings in England (PHE 2017) which contains guidance on menu planning, food safety, managing food allergies and reading food labels.
- The setting manager is responsible for ensuring that the requirements in Safer Food Better Business are implemented.
- Cooks and all staff responsible for preparing food have undertaken the Food Allergy Online
 Training CPD module available at http://allergytraining.food.gov.uk/.
- The setting manager is responsible for overseeing the work of the cook and all food handlers to ensure hygiene and allergy procedures are complied with.
- The setting manager has responsibility for conducting risk assessment based on the 'Hazard
 Analysis and Critical Control Point' method set out in Safer Food Better Business.

- Cooks carry out and record daily opening/closing checks, four weekly reviews and dated records of deep cleaning.
- The cook and setting manager maintain a Food Allergy and Dietary Needs information sheet with:
 - a list of all children with known food allergies or dietary needs updated at least once a term (the personal/medical details about the allergy or dietary needs remain in the child's file along with a copy of the risk assessment). This is clearly displayed for all staff and the risk assessment shared with all staff.
 - a record of food menus along with any allergens using
 - a copy of the FSA booklet 'Allergen information for loose foods' available at www.food.gov.uk/sites/default/files/media/document/loosefoodsleaflet.pdf
 - a copy of the Food Allergy Online Training CPD certificate for the cook and each member of staff that has undertaken the training
- The setting manager is responsible for informing the owners/trustees/directors who then reports to Ofsted any food poisoning affecting two or more children looked after on the premises. Notification must be made as soon as possible and within 14 days of the incident.
- Food poisoning can occur for a number of reasons; not all cases of sickness or diarrhoea are
 a result of food poisoning and not all cases of sickness or diarrhoea are reportable.
- Where children and / or adults have been diagnosed by a GP or hospital doctor to be suffering from food poisoning and where it seems possible that the source of the outbreak is within the setting, the manager will contact the Environmental Health Department and the Health Protection Agency, to report the outbreak and will comply with any investigation.

Purchasing and storing food

- Parents are requested not to bring food that contains nuts. Staff check packets to make sure they do not contain nuts or nut products.
- Bulk buy is avoided where food may go out of date before use.

- All opened dried food stuffs are stored in airtight containers.
- Dried packaged food is not decanted from packaging into large bins or containers as this
 prevents monitoring of sell by/use by dates and allergen information.
- Food is regularly checked for sell by/use by dates and any expired items are discarded.
- Bottles and jars are cleaned before returning to the cupboards.
- Items are not stored on the floor; floors are kept clear so they can be easily swept.
- Perishable foods such as dairy produce, meat and fish are to be used the next/same day.
 Soft fruit and easily perishable vegetables are kept in the fridge at 1-5 Celsius.
- Packaged frozen food should be used by use by dates.
- Food left over should not be frozen unless it has been prepared for freezing, such as homemade bread or stews. Hot food should be left to cool for up to 1.5 hours and then quickly frozen.
- Freezer containers should be labelled, dated and used within 1-3 months.
- Fridge and freezer thermometers should be in place. Recommended temperatures for fridge 37 degrees Fahrenheit (3 degrees Celsius), and freezers 0 degrees Fahrenheit (-18 degrees Celsius). Temperatures must be checked and recorded daily to ensure correct temperatures are being maintained.
- Freezers are defrosted every 3 months or according to the manufacturer's instructions.
- Meat/fish is stored on lower shelves and in drip-free dishes.
- Fruit and vegetables stored in the fridge are washed thoroughly before refrigeration to reduce risk of pests and E.coli contamination.
- Staff's own food or drink should be kept in separate designated area of the fridge; where possible, a fridge should be kept in the staff room to avoid mix ups.
- Items in fridges must be regularly checked to ensure they are not past use by dates.

Preparation of food

- Food handlers must check the content of food/packets to ensure they do not contain allergens.
- Food allergens must be identified on the menus and displayed for parents.
- Food handlers wash hands and cover any cuts or abrasions before handling food.
- Separate boards and knives are used for chopping food, usually colour coded.
- Raw and cooked foods are prepared separately.
- All vegetables and fruit are washed before preparing.
- Food left out is covered, for example when cooling down.
- Frozen meat, fish and prepared foods are thawed properly before cooking.
- Meat and fish are cooked thoroughly; a food probe is to be used to check temperature of roasted meat or baked meat products.
- Where a microwave is used, food is cooked according to manufacturer's instructions.
 Generally, it is not used to heat children's food and never used to heat babies' bottles.
- Microwaved food is left to stand for a few minutes before serving.
- A food probe is used to check temperature of food, including where heated in a microwave;
 it is checked in a number of places to avoid 'hot spots'.
- Food is cooked in time for serving and is not prepared in advance of serving times.
- Hot cupboards or ovens are not used to keep food warm.
- Potatoes and vegetables are peeled when needed, not in advance and left in water.
- Food prepared and cooked for different religious dietary needs and preferences, such as
 Halal or Kosher meat is cooked in separate pans and served separately.
- Food cooked for vegetarians does not come into contact with meat or fish or products.

- Food cooked and prepared for children with specific dietary needs is cooked in separate pans and served separately.
- A separate toaster is kept and used for children with a wheat or gluten allergy.
- Food prepared for children with dietary needs and preferences is clearly labelled and every effort is made to prevent cross-contamination.
- Raw eggs are not to be given in any form, such as mousse or mayonnaise.
- When given to children, eggs are fully cooked.

Serving Food

- Food is served for children on coloured plates.
- Staff risk assess the likelihood of children with dietary restrictions accessing the food of other children and must take appropriate action to prevent this from happening, for example:
 - check the list of children's dietary requirements displayed in the food preparation area
 - coloured plates
 - other methods as agreed by the setting manager
- Children with allergies/food preferences are not made to feel 'singled out' by the methods used to manage their allergy/food preference.
- Food served to children with identified allergies is checked by the key person to ensure that the meal (and its ingredients) does not contain any of the allergens for that child.
- The child's key person remains present throughout the child's mealtime.
- Food is taken from the kitchen to the rooms on a trolley, not carried across rooms.
- Tables are cleaned before and after, with soapy water or a suitable non-bleach product.
- Members of staff serving food wash their hands and cover any cuts with a blue plaster.

E.coli prevention

Staff who are preparing and handling food, especially food that is not pre-prepared for consumption e.g. fruit and vegetables grown on the premises, must be aware of the potential spread of E.coli and must clean and store food in accordance with the E.coli 0157 guidance, available at:

www.food.gov.uk/business-industry/guidancenotes/hygguid/ecoliquide#.U7FCVGIOWdI

Food for play and cooking activities

Some parents and staff may have strong views about food being used for play. It is important to be sensitive to these issues. For example, children who are Muslim, Jewish, Rastafarian, or who are vegetarian, should not be given any food to play with that contains animal products (Gelatine). Parents' views should be sought on this. In some cases, it is not appropriate to use food for play at all, particularly in times of austerity.

- Food for play may include dough, corn flour, pasta, rice, food colourings/flavourings.
- Jelly (including jelly cubes) is not used for play.
- Food for play is risk assessed against the 14 allergens referred and is included in the written risk assessment undertaken for children with specific allergies.
- Staff are constantly alert to the potential hazards of food play, in particular choking hazards and signs of previously undetected allergies.
- Pulses are not recommended as they can be poisonous when raw or may choke.
- The use of raw vegetables for printing is discouraged.
- Dried food that is used for play should be kept away from food used for cooking.
- Foods that are cooked and used for play, such as dough, have a limited shelf life.
- Cornflour is always mixed with water before given for play.
- Cornflour and cooked pasta are discarded after an activity; high risk of bacteria forming.
- Utensils used for play food are washed thoroughly after use.

Children's cooking activities

- Before undertaking any cooking activity with children, members of staff should check for allergies and intolerances by checking children's records.
- Children are taught basic hygiene skills such as the need to wash hands thoroughly before handling food, and again after going to the toilet, blowing their nose or coughing.
- The area to be used for cooking is cleaned; a plastic tablecloth is advised.
- Children should wear aprons that are used just for cooking.
- Utensils provided are for children to use only when cooking, including chopping/rolling boards, bowls, wooden spoons, jugs, and are stored in the kitchen.
- Members of staff encourage children to handle food in a hygienic manner.
- Food ready for cooking or cooling is not left uncovered.
- Cooked food to go home is put in a paper food bag and refrigerated until home time.
- Food play activities are suspended during outbreaks of illness.

Milk and baby food preparation and storage

Purchasing and storing food

- Where parents provide infant formula to be made up at the setting, this is checked to make sure it is in date and that the seal is not broken, then labelled with the child's name.
- Parents must not send in bottles containing pre-boiled and cooled water ready for formula to be added. They should instead send in empty, sterilised bottles in accordance with current NHS guidance on the preparation of formula milk.
- If parents are providing formula milk already made up at home, or breast milk, it should already be made up into sterilised bottles and clearly labelled with the child's name.
- Parents are advised to follow the manufacturer's guidance and to transport the prepared feeds or breast milk in a cool bag. On arrival, feeds are taken out of the cool bag and put straight into the fridge.

- Made up feeds or breast milk is always used on the same day.
- In line with current Food Standards Agency guidance, parents are advised not to give toddlers and young children (ages 1 4.5 years) rice drinks as a substitute for breast milk, infant formula or cow's milk. Parents should speak to their child's health visitor for further guidance if their child has a milk intolerance and needs an alternative.
- A small store of infant formula is usually kept in case of emergency. This is regularly checked to make sure it is still in date. Parents are consulted before it is made up.
- If parents provide weaning cereals, these need to be checked to make sure they are in date and should be in unopened packets. These are labelled with the child's name.
- Parents are informed that they should not bring in food that contains nuts. Staff check packets to make sure they do not contain nuts or nut products.
- Packaged baby cereal is kept in plastic airtight containers to prevent contamination and to ensure freshness.

Preparation

- Members of staff wash hands before bottle preparation.
- Preparation of feeds and weaning food is restricted to key persons or co-workers; other
 staff/students preparing food are supervised by a permanent staff member or key person.
- All weaning foods provided by the setting i.e. bread, cakes, biscuits, cheese and any foods in the 14 allergens list are identified and listed on children's menus.
- Scoops of milk are levelled off with a knife to make sure they are the correct amount.
- All water is boiled first before making milk feed, mixing food or preparing a drink for all babies under one year and should be allowed to cool for no more than 30 minutes. Water that has already been boiled once should not be boiled again.
- Water given to babies over 6 months old as a drink does not need to be boiled first, for babies under 6 months the above guidance applies.

- Bottles are cooled under cold running water and the temperature checked on the inside of an adult's wrist to ensure that it is body temperature, which means it should feel warm or cool but not hot.
- Only sterilised bottles, spoons, plates are to be used for babies under one year and these are to be kept in the milk kitchen.
- Vinyl gloves are used to prepare milk feeds or weaning food for babies.
- Raw fruit or vegetables given to babies are washed, peeled, cut or blended.
- Finger foods, such as rusks, are served in a dish.
- Babies are slowly introduced to food in the setting so that by approximately one year of age they are fully weaned according to need.

Menu planning and nutrition

Food supplied for children provides a healthy and balanced diet for healthy growth and development. Foods that contain any of 14 allergens identified by the FSA are identified on menus. The setting follows dietary guidance to promote health and reduce risk of disease caused by unhealthy eating. When planning menus, the setting manager ensures that:

- Parents and staff are able to contribute ideas for menus.
- Menus reflect children's cultural backgrounds, religious restrictions and the food preferences of some ethnic groups.
- Menus are clearly displayed so that parents and staff know what is being provided.
- Foods that contain any of the 14 major allergens are identified on the menu that is displayed for parents.
- Parents must share information about their children's particular dietary needs with staff
 when they enrol their children and on an on-going basis with their key person.
- Key persons regularly share information about the children's levels of appetite and enjoyment of food with parents.

- Staff refer to the Eat Better, Start Better (Action for Children 2017).
- The cook maintains a record of children's dietary needs in a Food Allergy and Dietary Needs folder.

Pre-prepared cook chilled meals and hot meals from suppliers

If the setting uses a food supplier to provide either hot meals prepared off site or chilled/frozen meals to be heated on site, the supplier's instructions for safe storage, heating and serving must be followed.

- Ingredients are checked to identify allergens (this will be clearly indicated on packaging).
- A temperature probe is used to check that cook chilled foods are heated correctly.
- Foods delivered hot are checked as above.
- Foods are served within the time stipulated by the supplier.
- Left-overs are not kept and reheated for another day.
- The guidance in Safer Food Better Business (Food Standards Agency 2020) is followed at all times.

Packed lunches

Where children have packed lunches, staff promote healthy eating, ensuring that parents are given advice and information about what is appropriate content for a child's lunch box. Parents are also advised to take measures to ensure children's lunch box contents remain cool i.e. ice packs, as the setting may not have facilities for refrigerated storage.

Baby and toddler mealtimes

Feeding and mealtimes are key times in the day for being close and to promote security, as well as for exploration and learning. We understand the importance of a healthy balanced diet for young children.

Bottle fed babies

- Babies' hands are washed prior to being given their bottle.
- Babies are fed by their key person or back-up key person if they are not in.

- Bottles are warmed and ready in time; babies should not be left hungry and crying while bottles are being prepared.
- The key person sits in a comfortable chair, or on cushions to feed the baby; the key person needs to be relaxed and calm.
- Babies should be held close so that eye contact can be made. Key persons are responsive to their communication gestures during feeding, talking quietly to them, stroking or holding their hands.
- Babies are winded after feeding, nappies are changed and the baby is settled to sleep or play.
- Other key children may want to be close to their carer when a baby is being fed. This may allay any anxiety or feelings of jealousy, especially for toddlers.
- Planning for feeding times should be done to try to avoid overlap so that one-to-one attention can be given. If this cannot be avoided the feeding times should be arranged so that the key person can comfortably be with both babies at the same time. Unless in extreme circumstances, feeding should not be regarded as a shared task; unfamiliar carers should not take over feeding times just to 'get it done'.
- Babies will want to hold their own bottles, but they are never left propped up with a bottle to feed themselves.

Toddler mealtimes

- For the most part, older babies and toddlers who are feeding themselves have their meals in their space, with their key group and key person.
- Staff who are eating with the children must role-model hygiene, healthy eating and best practice at all times, for example not drinking cans of fizzy drinks in front of the children.
- Food is brought to their room in serving dishes on a trolley.
- Staff arrange the table before toddlers sit down; there should be no waiting time.

- Babies' and toddlers' hands are wiped/washed clean before their meal.
- Key persons serve their children; they ask their children what they want; they do not put food on plates if the toddler indicates that they do not want it. Toddlers can get very upset if their detested food is put in front of them; they do not understand 'try a little bit' in the way an older child does.
- Babies and toddlers are not discouraged from eating with their fingers; this exploration of their food with their hands is the beginning of self-feeding. When they have finished, they may wish to 'play' further with any remaining food. It is fine for them to get a bit messy; they, and their table can be cleaned afterwards.
- Babies and toddlers are given time to eat at their own pace and are not hurried to fit in with adults' tasks and breaks.
- Mealtimes are relaxed opportunities for social interaction of babies and toddlers with their group and the adults who care for them. It is a time of sensory learning and learning skills, as well as for the fundamental satisfaction of being fed.
- In order to protect children with food allergies or specific dietary requirements, children are discouraged from sharing and swopping their food with one another.
- While toddlers are mainly fed in their rooms, opportunities should be open for older children to be invited into their room for lunch, especially siblings, or children who have just moved up into the older group. There should also be opportunities for babies and toddlers to join the older children for, providing they do not find this unsettling or distressing.
- Information for parents is displayed on the parent's notice board, including:
 - Ten Steps for Healthy Toddlers https://infantandtoddlerforum.org/media/upload/pdf-downloads/HR_toddler_booklet_green.pdf
 - Daily menus including identification of any foods containing allergens

Snack-times and mealtimes (older children)

Snack times

- A 'snack' is prepared mid-morning and mid-afternoon and can be organised according to the discretion of the setting manager e.g. picnic on a blanket.
- Children may also take turns to help set the table. Small, lidded plastic jugs are provided with choice of milk or water.
- Children wash their hands before and after snack-time.
- Children are only offered full-fat milk until they are at least two years old because they
 may not get the calories they need from semi-skimmed milk. After the age of two, children
 can gradually move to semi-skimmed milk as a main drink, as long as they are eating a varied
 and balanced diet.
- Fruit or raw vegetables, such as carrot or tomato, are offered in batons, which children should be encouraged to help in preparing. Bananas and other foods are not cut as rounds, but are sliced to minimise a choking hazard.
- Portion sizes are gauged as appropriate to the age of the child.
- Biscuits should not be offered, but toast, rice cakes or oatcakes are good alternatives.
- Children arrive as they want refreshment and leave when they have had enough. Children are not made to leave their play if they do not want to have a snack.
- Staff join in conversation and encourage children's independence by allowing them to pour drinks, butter toast, cut fruit etc.

Mealtimes

- Tables are never overcrowded during mealtimes. Some social distancing is encouraged even though it is acknowledged that children will play in close proximity for the rest of the session.
- Children help staff set tables.

- Cloths are used where practical and children's places are personalised with, for example,
 name cards and pictures.
- Their food is brought to their room already plated on a trolley. Dishes are not kept in a food warmer or oven so will not be too hot to touch.
- Children wash their hands and sit down as food is ready to be served.
- Staff who are eating with the children role-model healthy eating and best practice at all times, for example not drinking cans of fizzy drinks in front of the children.
- Children are given time to eat at their own pace and are not hurried to fit in with adults'
 tasks and breaks. They are not made to eat what they do not like and are only encouraged to
 try new foods slowly.
- In order to protect children with food allergies or specific dietary requirements, children are discouraged from sharing and swopping their food with one another.
- Mealtimes are relaxed opportunities for social interaction between children and the adults who care for them.
- There are sometimes opportunities for children to eat with friends on other tables. Children may be invited to the babies' room for lunch, to join a sibling or be with their previous carer if they have just moved up into the older group. There should also be opportunities for babies and toddlers to join the older children for lunch, providing they do not find this unsettling or distressing.
- Children go to the bathroom and wash their hands after lunch in their key groups.
- Information for parents is displayed on the parent's notice board, including:
 - Ten Steps for Healthy Toddlers https://infantandtoddlerforum.org/media/upload/pdf-downloads/HR_toddler_booklet_green.pdf
 - Daily menus including identification of any foods containing allergens

Meeting dietary requirements

Snack and mealtimes are an important part of the day. Eating represents a social time for children and adults and helps children to learn about healthy eating. We aim to provide nutritious food, which meets the children's individual dietary needs and preferences.

- Staff discuss and record children's dietary needs, allergies and any ethnic or cultural food preferences with their parents.
- If a child has a known food allergy, procedure Allergies and food intolerance is followed.
- Staff record information about each child's dietary needs in the individual child's registration form; parents sign the form to signify that it is correct.
- Up-to-date information about individual children's dietary needs is displayed so that all staff and volunteers are fully informed.
- Staff ensure that children receive only food and drink that is consistent with their dietary needs and cultural or ethnic preferences, as well as their parent's wishes.
- The menus of meal and snacks are displayed on the parent notice board for parents to view.
 Foods that contain any food allergens are identified.
- Staff aim to include food diets from children's cultural backgrounds, providing children with familiar foods and introducing them to new ones.
- Through on-going discussion with parents and research reading by staff, staff obtain
 information about the dietary rules of the religious groups to which children and their
 parents belong, and of vegetarians and vegans, as well as about food allergies. Staff take
 account of this information when providing food and drink.
- Staff provide a vegetarian alternative when meat and fish are offered and make every effort to ensure Halal meat or Kosher food is available to children who require it.
- Where it is not possible to source and provide Halal meat or Kosher food, a vegetarian
 option is available; this will be discussed and agreed with parents at the time of the child's
 registration.

- All staff show sensitivity in providing for children's diets, allergies and cultural or ethnic
 food preferences. A child's diet or allergy is never used as a label for the child, they are not
 made to feel 'singled out' because of their diet, allergy or cultural/ethnic food preferences.
- Fresh drinking water is available throughout the day. Staff inform children how to obtain the drinking water and that they can ask for water at any time during the day.
- Meal and snack times are organised as social occasions.

Fussy/faddy eating

- Children who are showing signs of 'fussy or faddy eating' are not forced to eat anything they
 do not want to.
- Staff recognise the signs that a child has had enough and remove uneaten food without comment.
- Children are not made to stay at the table after others have left if they refuse to eat certain items of food.
- Staff work in partnership with parents to support them with children who are showing signs of 'faddy or fussy eating' and sign post them to further advice, for example, How to Manage Simple Faddy Eating in Toddlers (Infant & Toddler Forum)

 https://infantandtoddlerforum.org/health-and-childcare-professionals/factsheets/

Breast feeding

We recognise the important benefits of breastfeeding for both mothers and their babies. All mothers have the right to make informed choices and staff will ensure that clear and impartial information is available to all mothers. Staff will fully support parent's choices.

We promote the Department of Health's recommendations on feeding infants, as follows.

- Breastmilk is the best form of nutrition for infants.
- Exclusive breastfeeding is recommended for the first six months (26 weeks) of an infant's life.
- Six months is the recommended age for the introduction of solid foods for infants.

 Breastfeeding (and/or breast milk substitutes, if used) should continue beyond the first six months, along with appropriate types and amounts of solid foods.

General

- Support is offered to promote and maximise the benefits of breastfeeding to new and
 expectant mothers attending the setting. Information is provided in the form of leaflets
 and 'signposting' to support groups and other sources of information.
- Publicity materials for bottle feeding and formula milk are not displayed within the setting.
- Mothers are enabled and supported to feed their babies within the setting. Every effort will be made for mothers who wish to feed their babies in private to do so.
- Toilet and baby changing areas are not offered as areas for breastfeeding as these cannot offer a hygienic environment.
- If a visitor to the setting objects to a mother breastfeeding, the 'complainant' will be moved to an area where s/he can no longer view the mother. The mother will not be disturbed.
- Staff co-operate with healthcare professionals and voluntary support groups to ensure a
 consistent approach to the promotion of breastfeeding benefits throughout the setting.
 This will be achieved by sharing of information and resources
- Staff do not discriminate against any mother in her chosen method of feeding and will not dictate choices to mothers
