

Aaron's employment with the city ended November 15. He was the staff member responsible for citywide maintenance tasks as well as daily water operations. The city decided to wait to make a hiring decision for water operations while we complete the periodic update of our Water System Plan. Clearwater Utility Services will perform satellite management services for our water operations. Meanwhile, we are very happy to announce that one of our great volunteers, Charlie Ashman, has stepped into the maintenance position and will also assist with administrative water tasks such as reading meters and connecting/ disconnecting service.
