## Broilers/Meat Birds

**\$2.65 each**

**Straight run**

\*\* Discount\*\* 100 or more \$2.55 each

### CORNISH ROCK CROSS

The large massive Cornish Cockerels are bred to large broiler type White Rock hens. The cross produces one of the finest quality broiler type chicks that can be found anywhere. They make market weight in 7 weeks. Many of our customers report 4 lb. broilers in 7 to 8 weeks. They give you the desired broad breast, big leg, big thigh, uniform conformation, rich yellow skin, extra fast feathering, real prime broilers. We cannot overemphasize the importance of

proper nutrition for your successful results from our Cornish X Rock Cross chicks!

### FREEDOM RANGERS

This slow growing broiler is well-suited for more natural rearing methods, such as free range or organic systems. Characteristics include yellow skin, Shanks and beaks along with mostly red feathering, including a small percentage of tri color birds. Expect 4 to 5 lb birds (live weight) in 9 to 11 weeks.

## TURKEYS ~ Straight run only

### BROAD BREASTED WHITE

Our broad breasted whites are an extra good compact meat type bird. They dress out well at almost any size, with a pleasantly plump carcass. They are a favorite of many because they look

so well when dressed, having no dark pin feathers, and such fine color.

**\$12.60**

### ORLOPP MAMMOTH BRONZE

Our Bronzes are outstanding examples of this breed. Handsome, colorful birds that attract attention whenever seen. Hens average 18 to 20 lbs. and toms average 30 lbs.

**\$12.60**

### ARTISAIN GOLD

This rare black breed of turkey is smaller in size and slower growing. They thrive in a free range environment where it can express natural tendencies such as running and roosting. The Artisan Gold offers a robust, gamey taste that is exotically different from traditional turkeys.

**\$12.60**

## DUCKS ~ \$9.00 Straight Run Only

### WHITE PEKIN

White Pekins are ideal if you're looking for a dual-purpose breed. They have a picturesque appearance and a docile temperament making them well suited for backyard flocks. Without

restrictive feeding, they can grow to enormous sizes.

### KHAKI CAMPBELL

Khaki's are considered one of the best dual purpose ducks and are prolific layers. They can produce 250 tinted eggs per year.

### MALLARD

The Mallard drake is one of the most beautifully colored of all waterfowl. Mallards fly, but will usually stay at home if fed regularly.

### BLACK SWEDISH

If you've heard of Daffy Duck, then you are familiar with Black Swedish ducks! Black Swedish are good all-purpose birds. They are good layers, a little shy, but grow to a

substantial mature weight and are excellent foragers. If you are looking for a duck that will do well in your backyard or on your small farm, Black Swedish

may be a good choice for you.

### BLUE SWEDISH

First imported to the US from Pomerania in the 1800s, Blue Swedish ducks have been around for a long time. Blue Swedish make a good "utility duck" that can provide eggs and meat, but they also make a beautiful addition to your flock. With that in mind,

Blue Swedish makes a great exhibition bird if that is what you are looking for!

### BUFF

The Buff was developed by the William Cook family, who lived in the Orpington area of Kent, England, in the early 1900s. It was created as a multipurpose bird,

with the ability to lay good quantities of eggs, along with having the size and feather color to make a good roasting duck.

### CAYUGA

The Cayuga breed is thought to have been developed from the wild Black Duck breed in the region of Lake Cayuga in New York. This makes it one of the few duck breeds originating in the United States. They are very hardy ducks, and many of their eggs have

varying degrees of gray in the shell color. On rare occasions, they will lay a pure black egg.

### MIXED INDIAN RUNNER

These ducks are all about adding color and charm to your space. With a mix of chocolate,

white, fawn, black, and blue, they bring a vibrant touch to any flock. These ducks are not just eye-catching; they're also eco-friendly helpers. They love foraging on waste rice, weeds,

and bugs, making them perfect companions for sustainable farming.

### ROUEN

The Rouen is a heavyweight breed of domesticated duck, primarily raised for meat, exhibition, or as general-purpose ducks. Since they are not prolific egg

layers, Rouen ducks are most commonly bred for their meat.

**BANTAMS ASSORTED**
