A greater feeling of pleasure with a sexual enhancement and the drastic reduction in penile curvature in case of deformity. Are the results achieved from the procedure with enriched plasma (**Platelet Rich Plasma**), used for the treatment of erectile dysfunction and penis dell'induratio plastic, which the US now arrives in Italy.

"The Prp therapy combined strength to all those people who for various reasons no

longer respond to treatment with inhibitors of phosphodiesterase type 5, the famous love pills. **Some patients have even reported an increase in length and circumference** penis and sexual desire, "says Adnkronos Salute Gabriele Antonini, urologist-andrologist of Rome, who collaborated with colleagues Joseph Banno Chicago and Paul Perito Miami.

The Prp is **used for several years, successfully, in orthopedics and sports medicine** and has quickly become the United States one of the most effective methods of treatment for erectile dysfunction and penis plastic induratio or Peyronie's disease (a condition which It determines the pathological curvature of the penis that does not allow more normal penetration). "The human body has a remarkable ability to heal itself. The regeneration of a fabric is obtained with the natural production of stem cells - recalls Antonini - The Prp provides for the application of concentrated platelets rich in bioactive proteins that release growth factors for stimulate cell regeneration and accelerate tissue repair. "

The treatment starts with a simple blood sample placed in a centrifuge which separates plasma and platelets from the rest of the blood. "The plasma, enriched with highly concentrated platelets, is collected in small syringes and injected into damaged tissue again. **The Priapus shot *, so you call the procedure - explains the urologist - is performed on an outpatient basis** by applying locally a simple anesthetic cream before injection, without any discomfort during the treatment. "

"In the United States were performed **more than 60,000 procedures Prp no side effects or complications** . In Italy was approved by the Ministry of Health," he continues.

"The growth factors **stimulate the regeneration of new tissue in the corpora**

Erosion to concrete, all the ills of the Italian coast

cavernosa, the growth of new blood vessels and therefore improving circulation within the penis - said Antonini - The results consist of stronger erections, increased feelings of pleasure. And 'how to put back the clock and what was old and damaged back again. Many of these benefits are immediate after the injection. the treatment is hypoallergenic and free of side effects - it concludes - because it uses and reinfonde the plasma of the same person".
