MINUTES

Dale reported the leaks in the inlet at the lake had been excavated and the contractor is proceeding with filling with fabric and sand, then they will add the clay layer. After a question, Dale stated he planned to shut off the irrigation system the 2nd of November. Dale also stated the City of Moab wanted to pump the Corbin Well to take samples, and would utilize the irrigation system as a place to pump the well to. This pumping will take place after the system is shut off and lake water drained.

LEAKS IN KEN'S LAKE

James Walker asked about the measuring device in the tunnel and was told it had been fixed in July. Gary asked if we might excavate in the inlet to dredge out the sand and if we did it every year it would probably be more economical. It has been estimated we had lost 5 or 6 acre feet of storage in the reservoir due to silt build-up. Dale was asked to consult with Boulden as to cost.
