

ABU DHABI PALACE PLEIADES STAR MAP

The purpose of this illustration is to show that the capital city of the United Arab Emirates, Abu Dhabi approximates the Cydonia, Mars pyramid city complex. It appears that the city, as Dubai's Burj Khalifa have been designed with the 3 main motifs that comprise this celestial composition of the Pleiades pyramid city, the D&M pentagram structure and the Face of Mars or that of Ala-lu. This illustration is highly suggestive but the template fits the city ley-liens that run almost exactly to the Cydonia, Mars ley-Line. For example the Emirates Palace comprises the pyramidion the 'triangle' construed from this spot to the Golf and Equestrian Club. This site is corresponding to the Face of Ala-lu as it is in the case of Madrid. The 3rd node is a bit more suggestive as there is a 5-sided structure corresponding to the position of the D&M pentagram of Cydonia.

Emirates Palace

333°
Heading

The Emirates Palace has a 333° heading as does the Cydonia complex and the inclination of the Abu Dhabi is at an approximate 45 degree angle. The only variation that occurs with the Cydonia Pleiades pyramid complex is that the 'Pyramid City' is in front of the Emirates Palace. There are 5 prominent towers called the Jumeirah al Etihad Towers and 2 other lesser structures but all the same very impressive and beautiful architecture. These 5 towers suggest the pentagram that is also incorporated into the Pleiades pyramid city on Mars.

Pleiades Pattern Reversed
PYRAMID CITY

Abu Dhabi

~6.66 miles

Data: NOAA, U.S. Navy, NGA, GEBCO
