Dear Cattlemen -

Welcome to our Annual Bull Sale. Come early and walk through our yards and view the bulls on display. Then come in our heated sale barn, enjoy a beef sandwich, and sit back and enjoy the auction on three large screens where you can make a great selection for your herd.

We have a great set of bulls to show you and with the Hereford and Angus genetics, we can produce the quality of beef that is in demand now more than ever. With today's cattle market, now is the time to use the best genetics you can find to improve your profit potential. The bulls are fed a diet with high roughage ensuring soundness and longevity.

We will be happy to take the time to show you any of the bulls before the sale. Just give either one of us a call. Thank you for your past patronage, and remember, we don't forget you once you load your bull out!

Hope to see you Friday, February 22, at 1 p.m. at the ranch, 37195 285th street, which is 2 miles west of Geddes, SD.

Mark and Dennis Gant

Cattle Evaluation Terms

EPD's Expected Progeny Difference: Estimate of a bull or cow's future progeny performance compared to progeny of a breed average sire or dam.

BW: Birth Weight
WW: Weaning Weight
YW: Yearling Weight
M&G: Milk and Growth
CEM: Calving Ease Maternal
SC: Scrotal Circumference
FAT: Backfat

REA: Rib Eye Area
IMF: Intramuscular Fat or Marbling
CHB: Selected and Weighted traits of an animal that reflect the animal's feedlot and carcass profit potential.
BMI: Baldie Maternal Index
CEZ: Calving Ease Index
CHB: Certified Herford Beef Index

Individual Performance

BW: actual weight at birth

BWR: ratio compared to other calves birth weight in same herd

WWR: ratio compared to other calves 205 day weight in same herd.

Calving Ease:

There is more to calving ease than birth weight. Birth weight, shape of calf at birth, pelvic area, size of cow and nutrition during gestation can all effect calving ease. BW and MCE should both be considered when selecting bulls. Continued selection for just light BW can lead to low growth rates.

Bulls have the greatest economic impact on any breeding program. 80% of the improvement in a herd over time is attributed to bull selection.

There's no mama like a Hereford-sired mama. Net income of \$51 more per cow per year and a 7% advantage in conception rate, compared to straight Angus females.* All this from a bull that is known for its fertility and easy-going nature. Hereford bulls — better mamas and no headaches.

Hereford — gentle bulls making black better.

Qualifications

Premium Red Baldy is a female-only program, capitalizing on hybrid vigor. No steers will be tagged in this non-PVP tagging program.

To qualify for Premium Red Baldy, females must be sired by bulls in the top 50% of the breed for Baldy Maternal Index (BMI\$) or Herdbuilder Index (HB).

Breed percentages on qualified females will range from 25%-75% Red Angus and Hereford, with a small allowance for other breeds.

Females must be red-bodied with either a bald or brockle face. No black-hided cattle will be admitted, regardless of genetic makeup.

A groundbreaking, genetically verified female program for the commercial beef industry.

Benefits

Premium Red Baldy is a tagging program designed to take advantage of hybrid vigor by maximizing the best traits of both Red Angus and Hereford and providing commercial producers with premium replacement females.

The program will help producers access genetically verified females that have the best combination of longevity, fertility and adaptability to incorporate into producers' herds.

The Premium Red Baldy program has the ideal balance of maternal and carcass traits, which will yield cattle poised to increase the profitability of the commercial producer.

Premium Red Baldy uses genetics supported by the only two beef breed associations backed by whole herd reporting.
