**“The SQ is really cost effective. It saves us money and saves the homeowner's money.”**

**Bill Schlotter**  
Raab Well Drilling

The built in dry-run and temperature protection features of the Grundfos SQ eliminate the need for additional motor protection devices. The Grundfos SQ can be installed with smaller gauge wire and a smaller bladder tank. This simplifies the installation and lowers the system cost for the homeowner.

Conventional 4" pumps do not have integrated motor protection and require a larger gauge wire for starting current – increasing the cost to the homeowner.
