## TEAM & POTENTIAL PARTNERS Website Development

---

### Web Developers/Software Programmers

Top software development firms in the UK and Spain that could be great partners to create the pilot platform for the AI social media startup include:

#### UK:

- Neon Tribe - Award-winning UK agency experienced building digital platforms and apps. Specialize in innovation.
- Made by Many - Well-regarded London firm focused on product design and development for startups.
- Talented Mister A - Creative developer that has worked with startups and brands like Deliveroo and Financial Times.
- 7digital - Over two decades of experience building highly scalable music/media platforms.
- Ficode – A software development company offering a wide range of services, including web and app development.
- Bespoke Software Development – Specialises in bespoke software solutions tailored to specific business needs.
- Red Badger – Provides digital product development services, including web and app development.
- Mubaloo – A mobile app development company with expertise in building innovative web solutions.
- Softwire – Offers custom software development services.

#### Spain:

- BQ - Spanish consumer electronics company with large in-house software team. Could provide affordable development.
- Intelygenz - Madrid firm focused on AI, big data and cloud development. Expertise in advanced platforms.
- Nodes - Company builder located in Barcelona that partners with startups on MVP builds.
- Secuoyas Studio - App developer backed by major Spanish VC Secuoyas. Experience with social apps.
- Scalac – Software development company specialising in building scalable solutions using cutting-edge technologies.
- Methinks – An experienced team of developers offering custom software development services.
- XenonStack – Provides software development services with expertise in AI, machine learning, and chatbot development.
- InnovationM – Offers end-to-end software development services, including web and app development.
- MarsBased – A development consultancy with expertise in building web applications and APIs.
