

**NEVER
LET
THIS
HAPPEN
AGAIN!**

RUST-BLOCK™ is a revolutionary water-based compound that inhibits rust on all ferrous metals, yet it's harmless to skin or the environment.

Rust Block is ideal for home or shop. Use it to protect your tools, auto parts, hardware, and garden equipment.

It's also ideal for industrial use. Safely and economically support production line, maintenance, storage or shipping operations.

If you're environmentally friendly, you'll get along great with RUST-BLOCK™. It's non-corrosive, non-flammable and biodegradable. Most users simply rinse used solution down the local sewer system.

How long will RUST-BLOCK™ last once it is applied?

RUST-BLOCK™ will inhibit rust from forming on most metal for six months. Variables include smoothness of the metal, temperature and humidity.

There are so many types of metal. Will RUST-BLOCK™ work on all kinds?

Yes, RUST-BLOCK™ will work with all ferrous and non-ferrous metals. It has been tested on copper and brass and works very well with these metals.

If the steel has a coating, will the coating be damaged by using RUST-BLOCK™?

No, RUST-BLOCK™ will not damage any polymers, plastics, or coatings, and can even be used on painted surfaces without damaging most paints.

Are there any conditions that will affect the performance of RUST-BLOCK™?

Yes, RUST-BLOCK™ is a water-based rust inhibitor designed for indoor use. If RUST-BLOCK™ is exposed to water, the water will weaken and/or remove the protective coating. Therefore, items treated with RUST-BLOCK™ must be kept away from direct contact with water.

When RUST-BLOCK™ is used as a rust inhibitor, should it be removed prior to treating metal with a coating or paint?

Yes, most coatings bond with the metal. Therefore, RUST-BLOCK™ should be removed before any other coatings are applied. We recommend that the RUST-BLOCK™ be rinsed off with water and the parts dried prior to another coating.

*It's easy to
defend against
RUST!*

HOW TO USE RUST BLOCK™

1. Make sure item is clean and dry.
2. Coat surface evenly (spray, dip, wipe or brush on).
3. Allow to dry.
4. Store item indoors. Avoid moisture.
