

LS-1 and LS-2/2P Series Lockset to be phased out by 2016

To: Linear Access Control Customers

Subject: End of Life, LS-1 and LS-2 Series Product

Effective immediately, Nortek Security & Control is phasing out all LS-1 and LS-2 lockset models.

Our manufacturing plant in Michigan has built the final production run, which should provide several months of supply for most models of the LS Locksets, however inventory availability will vary by SKU.

The remaining stock of locksets are available on a first-come, first-served basis, and the line of locksets will be discontinued permanently with no successor models when inventory is depleted.

Models Being Discontinued:

LS-1 (Cylindrical, Mortise, Deadbolt and Exit)

LS-2 (Cylindrical, Mortise, Deadbolt and Exit)

Model	Model Description	Part_No
