

INTRODUCING THE SST-II HYDRAULIC BI-FOLD SYSTEM

UNIQUE OPPORTUNITIES

The SST-II is the only hydraulically-operated bi-fold system available, today. The system uses no cables or straps resulting in the cleanest, least obstructed panel face in the market, today.

SAFETY

Through use of a hydraulic system, all pinch points and moving parts typically associated with cable/strap systems have been eliminated.

SIMPLICITY

The incorporated SST-II mounting frame allows for the easiest install in the market. Operation is hassle-free and maintenance is minimized.

FINISH

Once shipped, the SST-II System may be clad with virtually any material allowing the customer to best match their surrounding environment
