

## Natural Landscaping is:

### *Beneficial*

Choose organic methods to create a healthy environment for all living things.

### *Enlightened*

Revive lost ecosystems and conserve water by planting species that are adapted to the area.

### *Joyous*

Provide enjoyment through plantscapes instead of your mow-me-weekly turf grass.

### *Alive*

Attract a diversity of birds and insects that have few natural places left to call home.

*Put Down Roots... Plant Native*

Gibson Woods Chapter of:

**Wild Ones**  
NATIVE PLANTS. NATURAL LANDSCAPES

*If nothing moves in your landscape but a lawnmower, it's time to think about designing a natural yard.*
