

Chin Cup Cutaway Instructions

1. Remove left or right side ladder strap.
2. Place clevis pin with one washer through ladder strap mounting hole.
3. Take conical spring and slip over the clevis pin so the widest part of the spring rests against the back of the ladder strap.
4. Push clevis pin through the helmet grommet until the cotter pin hole is seen on the inside of the helmet.
5. Place one more washer over clevis pin.
6. Take red cotter pin handle and slip cotter pin through the clevis pin hole.
7. Align cotter pin in the same direction as you would pull the handle.
8. Adjust handle to desired location and use Velcro as needed to secure in place.

***** TEST PULL THE CUT AWAY SYSTEM TO BECOME FAMILIAR WITH ITS OPERATION PRIOR TO JUMPING *****

Note: when handle is pulled, the clevis pin and spring will shoot from the helmet. Test in a small-enclosed area so as not to loosen the components.
