Are you struggling to manage forms?

Tired of paper forms, missing or bad data, inconsistencies across the team, and manual retyping of data into your back end systems. Your admin staff forgetting to order new forms or a staff member taking the last form and not telling anyone there are no more forms left and to order more from the printers....

There is a better way...

SkyConnects Forms gives you the ability to create personalised forms (or build your own) for your Tablet or Smartphone. Gather data forms, CAD sketches, add photos, audio, etc on your device and access the collected information via a website.

Key Features:

- Dramatic Create personalised forms (or build your own) for your mobile device
- Gather form data, GPS location, draw CAD sketches, add photos, record audio, and get signature on your Tablet or Smartphone
- Data is stored in the cloud or export to most common formats
- Free trial available - no credit card required
- Dispatch work orders or part pre fill forms via the website
- Send completed forms direct from the Tablet/Smartphone in PDF
- Field calculations available in forms
- Track workers, show on Google maps where they have been.
- Get driving directions to customers/clients

Business Benefits

- Eliminate the cost of paper and printing
- Always have the latest forms available
- Eliminate the cost of data entry
- Mitigate risk of data entry errors
- Easy retrieval of completed forms, reproduce output of current forms

Ideal for:

- **Sales orders/Merchandising** – push customer information, prices, previous quantities ordered and record CRM information and take orders
- **OH&S & JSA forms** – record any issues, take before and after pictures, capture time and location as well as signatures
- **Field work** – schedule and push job information via the website to mobile workers to record parts used, time on site, travel time and rectification
- **Inspection and Questionnaires** – capture information via tables and workflow management of forms, calculate fields in real time on the form. Capture data via NFC and bar-coding
- **Stock taking** – Generate stock take forms prefilled out with stock code, description, bin location, previous quantity – capture via barcode or manual entry

Free trial - get started with SkyConnects Forms and revolutionise your business

Simply send us a current form for us to review and we will build a form for you to try on your tablet or smartphone. When you complete the form on your device, you will transform the electronic form back to your original form.
