

Past Linton Lecturers

Allan D. Callow, MD (1989)

Gene Therapy and the Vascular Surgeon

John A. Mannick, MD (1990)

Reflections on Surgery for Aortic Aneurysm

Michael A. Gimbrone, Jr., MD (1991)

Vascular Endothelial Leukocyte Interactions:
Molecular Mechanisms and Pathophysiological
Consequences

Robert S. Lees, MD (1992)

Arteriosclerosis: A Reversible Disease

Valentin Fuster, MD (1993)

Pathogenesis of Atherosclerosis: New Advances
Based on the Understanding of Coronary Vascular
Biology

Jeffrey A. Gelfrand, MD (1994)

A New Role for Coagulation and the Platelet in
Atherogenesis: Modulation of Cytokine Synthesis

Peter Libby, MD (1995)

Regulation of the Stability of Atherosclerotic Plaques

Margot Kruskall, MD (1996)

Creating a Universal Blood Supply: The Enzymatic
Conversion to Group O of A and B Red Cells

Victor Dzau, MD (1997)

Gene Transfection Therapy for Preventing Vein Graft
Stenosis in Infrainguinal Grafts

Robert S. Langer, ScD (1998)

Biomaterials and How They Will Change Our Lives

Thomas Maciag, PhD (1999)

Molecular Mechanisms of Angiogenesis

William M. Abbott, MD (2000)

The Science of Arterial Prosthesis: Past Frustrations
and Future Promise

Gregario A. Sicard, MD (2001)

The Impact of Endovascular Surgeons in the Training
of Vascular Residents

John A. Mannick, MD (2002)

Fifty Years of Infrainguinal Reconstruction: What
Have We Learned

Judah Folkman, MD (2003)

Angiogenesis-Dependent Disease

Edith Tzeng, MD (2004)

Molecular Therapies and the Vascular Surgeon

Richard M. Green, MD (2005)

Challenges for the Practicing Vascular Surgeon

Daniel Levy, MD (2006)

Toward A Modern Understanding of Vascular
Disease: The Journey From Futility to Promise

Paul Friedmann, MD (2007)

Surgical Competence

Peter Gloviczki, MD (2008)

Open Venous Surgery in the Era of the Endovenous
Revolution

Robert Rutherford, MD (2009)

Changing Perspectives in the Management of
Abdominal Aortic Aneurysm

Jack L. Cronenwett, MD (2010)

The Role of Vascular Surgeons in Quality
Improvement

Frank W. LoGerfo, MD (2011)

The Biology of Vascular Injury

Frans Moll, MD, PhD, Professor (2012)

Reflections on Predicting the Unpredictable AAA

Paul Ridker, MD, MPH (2013)

Inflammation and Atherothrombosis: Where Have
We Been? Where Are We Going?

Past Linton Lecturers

No Speaker (2014)

Tara Mastracci, MD (2015)

Ensuring the Durability of Endovascular Aortic Repair

Spence M. Taylor, MD (2016)

Lower Extremity Peripheral Arterial Disease: A Perspective After 25 Years

Omaida C. Velazquez, MD (2017)

Leap Forward Innovations in Vascular Disease: The Surgeon's Role

Michael Jaff, DO (2018)

The Changing Healthcare Environment: What this Means for the Vascular Specialist

Peter A. Schneider, MD (2019)

Where Do Innovations Come From?
