

TRG EDI Connector for WorkWise ERP

DATA TRANSFORMATION

Data mapping, transformation, analysis, and auditing between EDI and WorkWise ERP .

E-MAIL DRIVEN RESULTS

EDI audits, analysis and exception reports are sent to your inbox.

FULLY AUTOMATED

Can be scheduled to automate processing of inbound and outbound transactions with WorkWise ERP.

Turnkey solution that provides seamless EDI integration with WorkWise ERP

Supports all WorkWise ERP customer EDI transactions including:

- 850 Purchase Order
- 830 Production Schedule
- 862 Shipment Authorization
- 856 Advanced Ship Notice
- 810 Invoice

Plus (without modification):

- 855 PO Acknowledgements
- 846 Inventory Advice

The TRG EDI Connector, developed with Microsoft .NET and SQL Server technology, is a web-based EDI data mapping, transformation and transaction management tool.

It provides seamless integration between X12 or EDIFACT EDI transactions and WorkWise ERP.

The TRG EDI Connector can also integrate WorkWise ERP with the SPS Commerce RSX Retail standard.

Using email-driven exception and audit reporting, the TRG EDI Connector can be scheduled to provide complete automation of inbound and outbound transactions between X12 or EDIFACT EDI and WorkWise ERP.

The TRG EDI Connector has been designed to streamline and automate day-to-day EDI operations and provide key auditing and analysis of your EDI transactions.

POWERFUL REPORTS

Our 830 Production Schedule Net Change Report takes the mystery out of schedule changes.

PROVEN RESULTS

TRG has been providing EDI integration with WorkWise ERP since 1995.

PROVEN TECHNOLOGY

Developed using Microsoft .NET and SQL Server technology.

TRG EDI Connector Features

Inbound 830/862 Production Schedule/Release

- Emails inbound summary report by trading partner/PO item.
- Emails Net Change Report detailing exceptions from previously received data.
- All 830 data is retained in the TRG EDI Connector and can be used as turnaround data for outbound EDI.

Inbound 850 Purchase Order

- Emails PO Inbound Audit Report for each Trading Partner detailing incoming PO information as well as any exceptions.
- All 850 data is retained for use as turnaround data for outbound EDI.

Outbound 856 Advanced Ship Notices

- Synchronizes with WorkWise ERP 856 Holding file to determine new ASN's to send and can be scheduled to send automatically. No "flat file" processing in WorkWise ERP is required.
- Emails an ASN Audit Summary detailing shipments processed.
- Can regenerate ASN transactions from TRG EDI Connector.

Outbound 810 Invoice

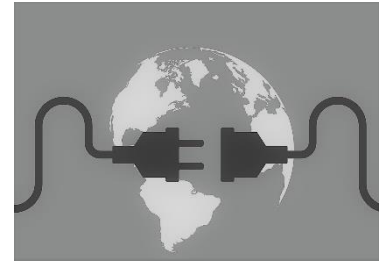

- Synchronizes with WorkWise ERP 810 Holding file to determine new invoices to send and can be scheduled to send automatically. No "flat file" processing in WorkWise ERP is required.
- Emails an invoice Audit Summary detailing invoices that were processed.
- TRG EDI Connector has an interface to allow regenerating 810 EDI transactions.

Outbound 855 PO Acknowledgement

- While not a standard WorkWise ERP EDI transaction, the TRG EDI Connector tightly integrates with WorkWise ERP to provide integrated 855 PO Acknowledgement transactions.

Outbound 846 Inventory Advice

- While not a standard WorkWise ERP EDI transaction, the TRG EDI Connector tightly integrated with WorkWise ERP to provide inventory data to your trading partners.

Prerequisites

WorkWise ERP EDI Module is Required

If a Value Added Network is required to communicate with your trading partner(s), TRG can work with you to source the most cost-effective VAN, if you do not already have a subscription.

TRG utilizes RSSBus for data communications supporting all EDI communication protocols including SFTP, AS2, and VAN connections among others. There is an annual subscription fee for this software that is included in our proposal.
